### MESSAGE

Livestock is an integral component of farming system in India which contributes immense support to the overall development of Agriculture sector in the country. Over the period, the contribution of livestock sector in the Agriculture sector has been showing steady improvement that attributes to its importance in the Indian economy.

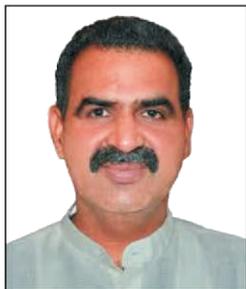

The State Governments and the State Departments of Animal Husbandry are also considered as indispensable part of the whole system in achieving the progress towards this sector. I am happy to share that Department of Animal Husbandry & Dairying takes painstaking efforts in compiling and publishing this report. "Basic Animal Husbandry Statistics 2020" records the current production estimates and many more statistics that are useful for all policy makers, researchers and other stakeholders across the globe. The information compiled here would not have been possible without the active participation of all States/UTs.

I congratulate the team of Department of Animal Husbandry & Dairying for bringing out this annual publication on a regular basis.

## MESSAGE

The livestock production plays a major role in the life of farmers. It provides food, income, employment and many other contributions to rural development. Animal products such as milk, egg, meat provide much required nutrition and daily cash income. Also, this sector plays an important role in the national economy and socio-economic development of the country.

The Statistics tools are the important fact-finding machines by which the growth of the sector is presented in a systematic manner. Statistics itself holds great importance for framing policies and programmes of all sectors including Animal Husbandry. The collection of Animal Husbandry Statistics has been undertaken since past in participation with all States/UTs. It is governed by a systematic approach through continuous support from State/UTs and monitoring by the Department of Animal of Husbandry & Dairying.

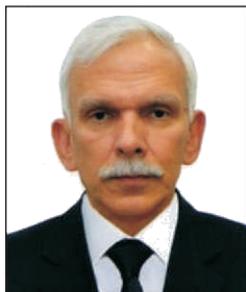

I am pleased to share this compendium with all the stakeholders as it gives a review of Animal Husbandry sector briefly in terms of statistics. I have learnt that this publication is a compilation of the all-relevant statistics of livestock sector that contains up-to-date information on livestock production, livestock population and other information like livestock diseases, infrastructure, etc. I appreciate the tireless efforts of officers and staff of Department of Animal Husbandry & Dairying in bringing out the annual publication.

## FOREWORD

Livestock rearing is an inseparable part of the rural community of our Nation. This sector is leveraging the economy in a big way considering the growth of the sector in terms of the output. Livestock Sector is presently recording annual growth rate of more than 9%. Its contribution to the Indian Agriculture and Indian Economy is in a progressive state with its contribution of 28.36 of Agriculture & Allied Sector GVA and 5.21% of total GVA. All policies and programmes of this sector are framed based on a strong data base. Hence, the role of statistics is vital in supporting all programme divisions of the Department with valid basic facts. Statistics Division is one of the main pillars of this Department providing considerable volume of data. These data provide in-depth analysis and help researchers and policy planners to bring out some key changes in the formulation of various schemes and programmes of Animal Husbandry Sector.

The report "Basic Animal Husbandry Statistics" contains tabulated data sets giving production estimates for major livestock products like Milk, Eggs, Meat and Wool. It also comprises of livestock population of different species by age, sex and uses, etc. Considering the immense importance of its utility for policy and planning purposes, the book is being published annually.

It is our hope that this publication, "Basic Animal Husbandry Statistics-2020" will be useful for administrators, policy planners, veterinarians, scientists, research organizations, Government agencies and other involved in the development of the Livestock Sector.

### PREFACE

The “Basic Animal Husbandry Statistics -2020” contains detailed tabulated data sets of production estimates for Milk, Egg, Meat & Wool up to the year 2019-20, consequent to the outcome of Integrated Sample Survey conducted during the period 1<sup>st</sup> March 2019 to 29<sup>th</sup> February 2020. The Animal Husbandry Statistics division entrusted with the task of generating the Basic Animal Husbandry Statistics that are required for policy formulation & programme implementation of Livestock Sector. Livestock Census & Integrated Sample Survey are two Schemes that support the States/UTs for generating the required statistics.

The present report is 21<sup>st</sup> in the series of reports through which production estimates for Major Livestock Products are being released. The Livestock is an integral part of Indian Economy. Contributing more than 29% of the total Agriculture GVA. Livestock rearing is one of the most important activity in rural area of the country providing supplementary income to the families dependent on Agriculture activities. The growing importance of this sector itself depends on the data and information of various parameters which ascertains the development of this sector.

The book also contains certain information from various ministries and departments, which are responsible for formulation of any policy in livestock sector. It contains statistics from Nation Statistical Office, Directorate of Economic & Statistics, Department of Agriculture & Cooperation and Population Statistics of the office of Registrar General of India. The data is also being used by various other ministries, NGO's and research institutions for analytical purposes.

Collection and compilation of a voluminous data to develop this document is a gigantic task & has involved sincere and dedicated efforts of all States/UTs and Central Government's Officer/Officials. Their efforts are appreciated and acknowledged. Appreciations are also due to Smt. Raj Kumari Beniwal (Director), Sh. Dipankar Mitra (Assistant Director), Ms. Ritu Singh (Assistant Director), Sh. Sunil Kumar (SSO), Sh. Jitender Kumar (Executive Assistant), Sh. Hardeep (Executive Assistant), Sh. Vijay Karayat (Office Assistant), and Ms. Sarita Jain (Technical Clerk) for compilation & examining the accuracy of the data and its timeliness.

Though extreme care has been taken in the preparation of this report, possibility of some errors and omissions, however, cannot be ruled out. I would be glad to have comments and suggestions for its improvement in future.

# CHAPTER-ONE

## INTRODUCTION

## INTRODUCTION

### 1.1 OVERVIEW

The Animal Husbandry Statistics (AHS) Division of Department of Animal Husbandry & Dairying (DAHD) is entrusted with the generation of Animal Husbandry Statistics through the schemes Livestock Census and Integrated Sample Survey. The Livestock Census (LC) is a quinquennial Census conducted across the country in participation with all the States and Union Territories. This is the basic source of data for the number of livestock and poultry held by the households in the country. The another important aspect is livestock production which is estimated annually based on the outcomes of Integrated Sample Survey (ISS). The survey is conducted in participation with States and Union Territories following a specified time line and methodology. The Survey methodology of Integrated Sample Survey is designed by ICAR-Indian Agricultural Statistics Research Institute (ICAR-IASRI).

Integrated Sample Survey is the only scheme through which considerable data, particularly on the production estimate of Major Livestock Products (MLPs) viz. Milk, Egg, Meat and Wool, is being generated for policy formulation in the livestock sector. Information on number of veterinary hospitals, polyclinic, goshalas, State farms and other infrastructure, number of Artificial Insemination performed and other animal husbandry statistics is also compiled through annual returns.

The present publication of Basic Animal Husbandry Statistics-2020 is framed based mainly on the outcomes of the Integrated Samples Survey for the period 1st March 2019 to 29th February, 2020. It has two Chapters

beginning Chapter One: Introduction including brief discussions on objective of survey, survey methodology, reference period, sampling design, analysis of data of milk, egg, meat and wool. Chapter Two contains summary of MLP data on annual production, growth rate, per capita availability, average yield per animal, state-wise & species-wise share etc. The report also contains tables of State-wise data of estimated production of milk, egg, meat and wool. Not only the total production statistics, the book also gives a picture on the estimated number of animals in milk production, estimated poultry egg laying birds, estimated number of animals slaughtered etc. Besides livestock production statistics it is also important to have included related statistics of Livestock population, such as GVA of livestock, export import data etc. so as to facilitate a ready reference of all such vital information. Moreover, the data of infrastructure such as number of veterinary hospitals, polyclinic, goshalas etc. have also been included in this report.

The results of the survey will be of use to the National Accounts Division, Department of Fisheries, Department of Agriculture, Cooperation & Farmers Welfare, Department of Animal Husbandry of States/UT governments, private agencies and research institutions etc. for effective policy, decisions making and researches.

### 1.2 OBJECTIVE OF THE SURVEY

The primary objective of ISS is to produce animal wise all India as well as state/UT level estimates of 4 major livestock products like milk, egg, meat and wool. It fulfills the need of

timely availability of reliable and current data relating to various livestock indicators which will further help in evolving, monitoring and evaluating various developmental schemes in this sector. It also contributes to stock of time series data on production of milk, meat, egg and wool which may be used in research and policy making.

### 1.3 REFERENCE PERIOD

The Survey is conducted from March to February. The entire period of one year is divided into three Seasons of 4 months. These Seasons are:

Name of the Season	Period of survey
Summer Season	1 <sup>st</sup> March to 30 <sup>th</sup> June (122 days)
Rainy Season	1 <sup>st</sup> July to 31 <sup>st</sup> October (123 days)
Winter Season	1 <sup>st</sup> November to 28 <sup>th</sup> or 29 <sup>th</sup> February (120 days or 121 days in a leap year)

### 1.4 COVERAGE OF THE SURVEY

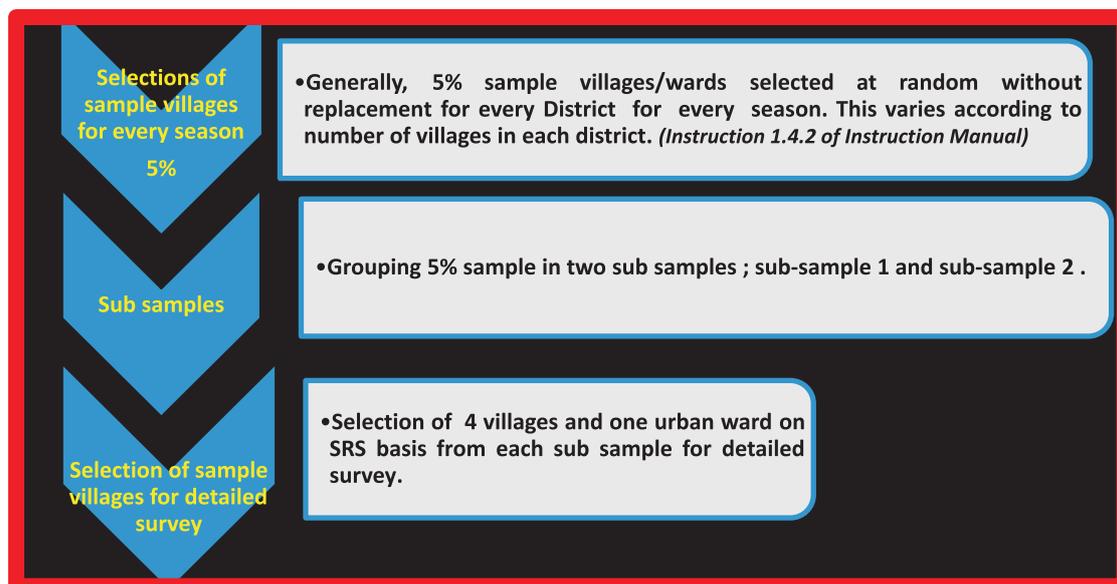

The Survey is conducted in the entire rural/urban areas of States/UTs. As a general principle, the survey is targeted to cover around 5% village in every season taking into account a total 15% villages, nearly 96,000 villages in a year. Since the year 2015-16, the survey covered urban areas too wherein 2 urban wards of each districts are selected at random for estimation of production of major livestock products.

### 1.5 SAMPLING DESIGN

The sampling design is a stratified three stage design with district as stratum. The first stage units are villages or urban wards, second stage

units are households and third and ultimate stage units are animals. The list of villages as per the latest Livestock Census constitutes the sampling frame. As mentioned under 1.2, the survey is conducted across the country in three seasons and based on the seasonal estimates, the annual estimates are derived. The State Department of Animal Husbandry is the nodal agency for implementation of the sample survey. The survey is conducted in two stages, (i) Complete Enumeration and (ii) Detailed Survey. The estimated livestock population is arrived based on complete enumeration and the average yield is calculated based on detailed survey. An outline of the sampling design is described in the following diagram.

Diagram: Selection of sample

For complete enumeration, a general principle of 5% villages/urban wards are selected for each district in a season covering a total of 15% of samples per annum using Simple Random Sampling without Replacement (SRSWOR) in a year. However, this is a general principle and varies according to the size of the district and availability of staff. The 5% villages/urban wards are further grouped into two sub-samples and the production estimates are derived for the two sub-samples separately. This is done for measuring the standard error. For detailed survey, a sample of 4 villages and 1 urban ward are selected from each sub-sample for the estimation of yield rate for rural and urban area separately. The sample villages and wards are selected by the States/UTs at the beginning of every survey period annually.

Since survey is conducted on seasonal basis, each season in a year is divided into 4 rounds (4 months). At the first month of every season the enumerators visit the households in the

selected village to list all livestock including poultry available in each household. This is a listing process based on which the total in-milk animals are estimated in case of milk production and total estimated layers in case of egg production, total number of animals/birds slaughtered in case of meat production and number of sheep shorn in case of wool production. For meat production, slaughter houses, poultry farms and butcher shops are also taken into consideration for estimating the number of animals/birds slaughtered. For capturing all these information eight schedules have been designed under the Integrated Sample Survey as mentioned briefly below:

- **SCHEDULE-I - General Information**  
General information about the villages elected for complete enumeration and particulars of those villages in addition to breed, sex, age wise livestock population as per latest Livestock Census will be collected here.

- **SCHEDULE-II - Complete Enumeration:** Listing of household/ household enterprises/non-household enterprises/institution in the village/ward will be done here. The information on Milch animals and Poultry in the sample and number of Animals Slaughtered during last 4 months will also be recorded in this schedule.
- **SCHEDULE-III - Details of milk yield in selected households:** For detail study, one cluster of two households/ enterprises each will be selected from each of six categories of cattle and buffalo for collection of data on milk yield. If none of the households selected for detailed study possess goat in milk, then 2 more households/enterprises having goats in milk should be selected. Beside the milk data, the information on utilization of total milk and dung from cattle, buffalo and goat will also be canvassed in this schedule.
- **SCHEDULE-IV - Details of egg production in selected households:** Selection of two clusters of 5 households/enterprises having layer birds (Fowl & Duck) for collection of yield rate for Desi and Improved Fowl & Duck will be done here along with collection of data on consumption and utilization pattern of Production of eggs etc.
- **SCHEDULE-V - Details of Egg production in the commercial poultry farms:** Collection of data through Administrative returns from all layer farms.
- **SCHEDULE-VI - Details of wool production in sample households:** By filing this schedule wool production data will be collected from a sample of 8 households.
- **SCHEDULE-VII - Information on yield of meat from recognized slaughterhouses:** This Schedule contains the information on number of animals slaughtered from all registered slaughtered houses in the district.
- **SCHEDULE-VIII - Details of Broilers and Layers' Meat production in the commercial poultry farms:** Schedules VII and VIII are related to meat production. So far as meat production is concerned, information number of animals slaughtered will be collected from all recognised slaughter houses in the districts and from all households and butcher shops in all the sample of villages/wards selected for complete enumeration.

## 1.6 TECHNICAL COMMITTEE OF DIRECTION (TCD)-2020 MEETING

Technical Committee of Direction for Improvement of Animal Husbandry Statistics (TCD) has been constituted under the Chairmanship of Animal Husbandry Commissioner, DAHD and Co-Chairmanship of Director, IASRI, to monitor and give advice on various technical aspects of Integrated Sample Survey. In similar lines, Technical Monitoring Committees have also been in place at State level to technically advise the State Government on the survey methodology and its implementation.

# CHAPTER TWO

## SUMMARY OF

### ANIMAL HUSBANDRY

#### STATISTICS-2020

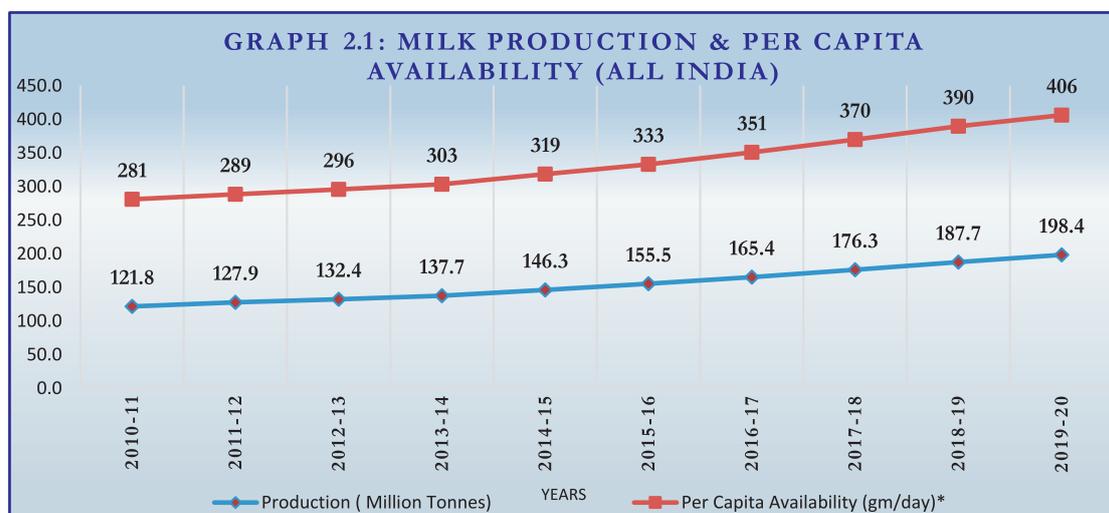

## SUMMARY OF ANIMAL HUSBANDRY STATISTICS-2020

### 2.1. MILK PRODUCTION

- ❖ Total milk production in the country is 198.44 Million tonnes.
- ❖ India ranks 1<sup>st</sup> in the world in terms of total milk production. (Source: FAO).
- ❖ The milk production has increased by 5.69 % over the previous year.
- ❖ The per-capita availability of milk is 406 grams per day.
- ❖ The average yield per animal per day for exotic/crossbred is 8.20 Kg per day and for indigenous/non-descript is 3.08 Kg per day.
- ❖ The milk production from exotic/crossbred cattle has increased by 10.95 % and indigenous/non-descript cattle has decreased by 3.10 % as compared to previous year. The milk production from buffaloes also decreased by 4.46 % as compared to previous year.
- ❖ Top 5 Milk producing States are: Uttar Pradesh (16.06%), Rajasthan (12.89%), Madhya Pradesh (8.62%), Gujarat (7.71%), Andhra Pradesh (7.69%). They together contribute 52.96 % of total Milk production in the country.

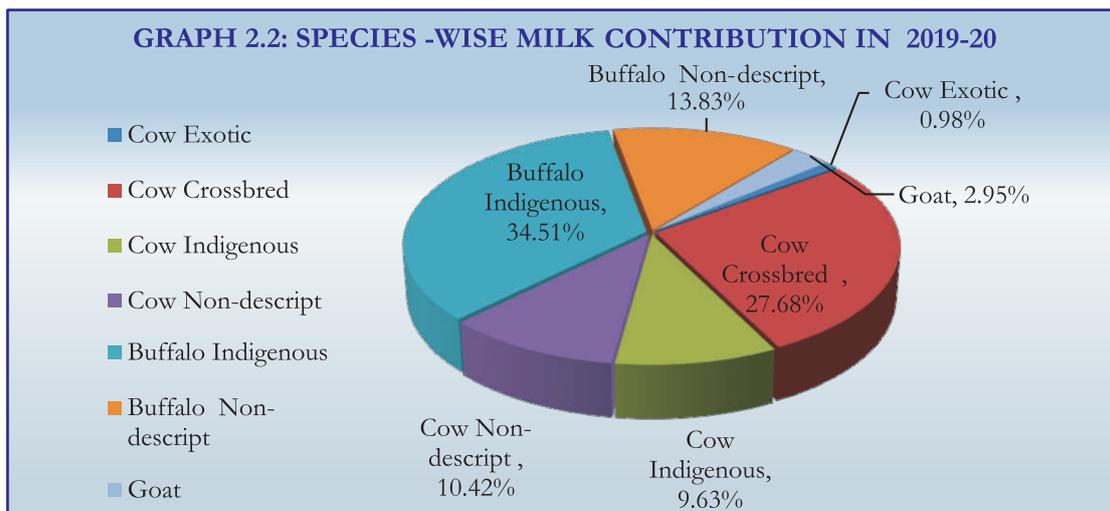

*Based on Projected Population of 2019 based as on Census-2011*

A trend showing the increase in milk production over the past few decades is depicted in the **Graph 2.1**. The graph shows there is a consistent increase in the production of milk over the years. The milk production has increased from 187.75 million tonnes in 2018-19 to 198.44 million tonnes in 2019-20

registering a growth of 5.69 %. Also, the per capita availability of milk was at 281 gm/day in 2011-12. There has been steady increase in per capita availability of milk since 2014-15. The per capita availability has increased from 319 gm/day in 2014-15 to 406 gm/day in 2019-20 as illustrated in the **Graph 2.1**.

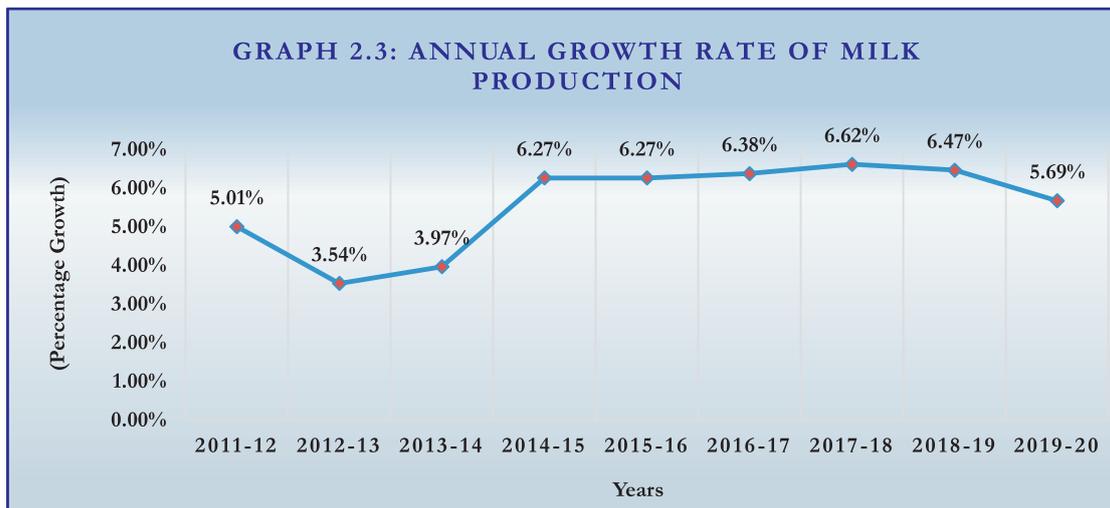

## 2.1.1 SPECIES-WISE MILK CONTRIBUTION

The **Graph 2.2** shows the contribution of milk production by Cattle, Buffalo and Goat. The analysis shows nearly 34.51 % of the total milk production is contributed by Indigenous Buffaloes followed by 27.68 % by crossbred cattle. The Indigenous cattle contribute 9.63 % of the total milk production in the country

whereas Non-descript cattle contribute 10.42 % and non-descript buffaloes contribute 13.83 % of the total milk production in the country. Goat milk shares a contribution of 2.95 % in the total milk production across the country. Exotic cow has little share (0.98%) to the total milk production.

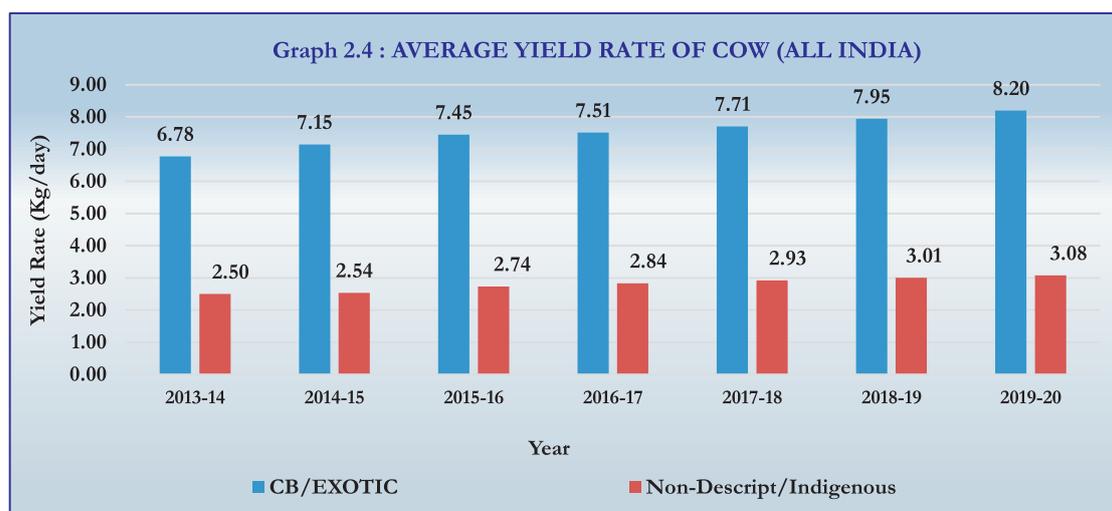

## 2.1.2 ANNUAL GROWTH RATE OF MILK PRODUCTION

**Graph 2.3** indicates the annual growth rate of milk production for the past ten reference periods. In the current year 2019-20, the milk production registered an annual growth of 5.69%. The consistent growth in the total milk

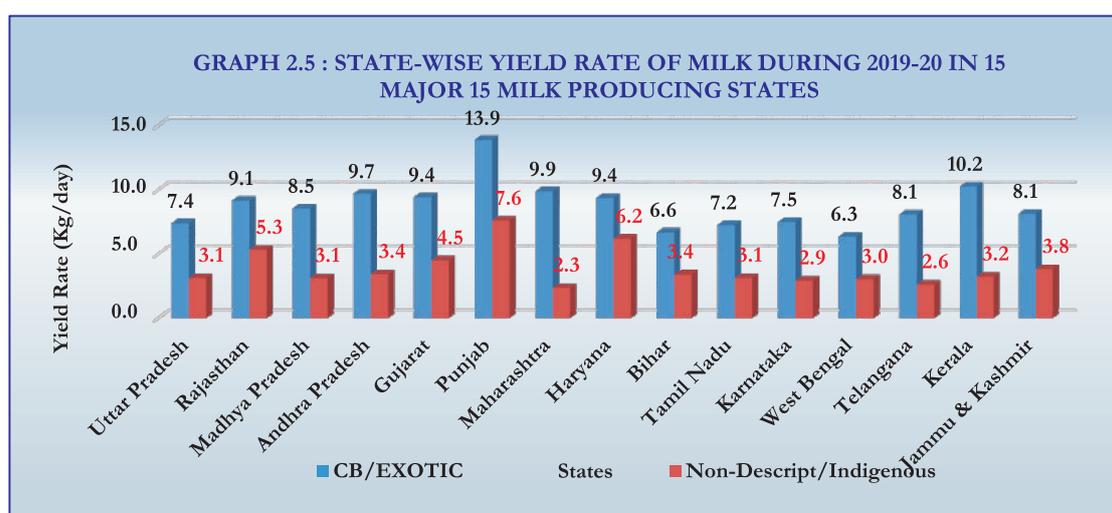

production of the country accounts is on account of the various initiatives taken by the Government to increase the milk production to support the increasing Human population.

## 2.1.3 AVERAGE YIELD OF MILK PER COW PER DAY

**Graph 2.4** shows that the milk yield of Exotic/Crossbred cows reported 8.20 Kgs per cow per day during 2019-20 and Indigenous/

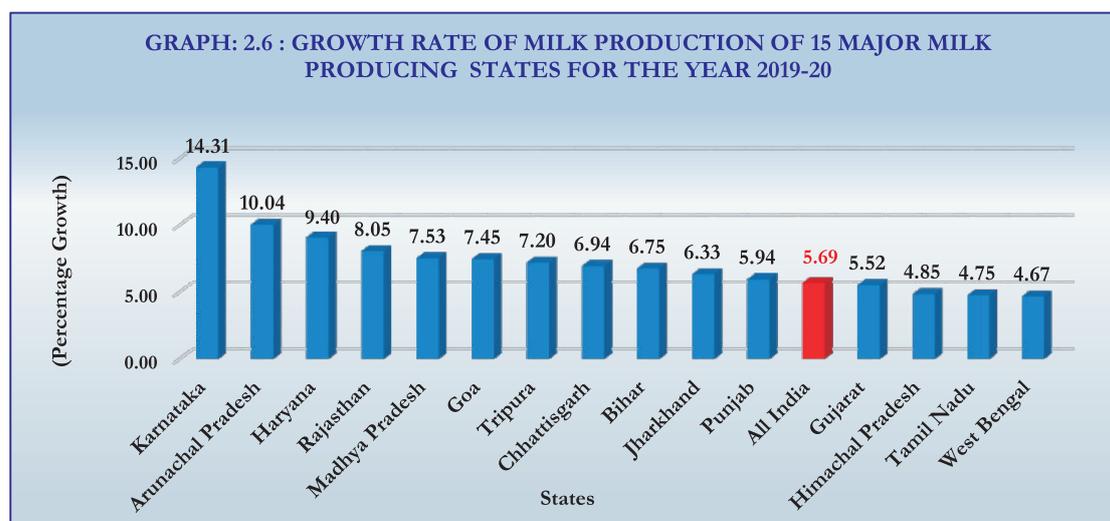

Non-descript cows reported yield of 3.08 Kgs per cow per day during the year 2019-20.

The yield rate was showing a progressive trend during the year 2013-14 to 2019-20. The State-wise variation in the yield rate of milk in

leading milk producing States is depicted in **Graph 2.5**.

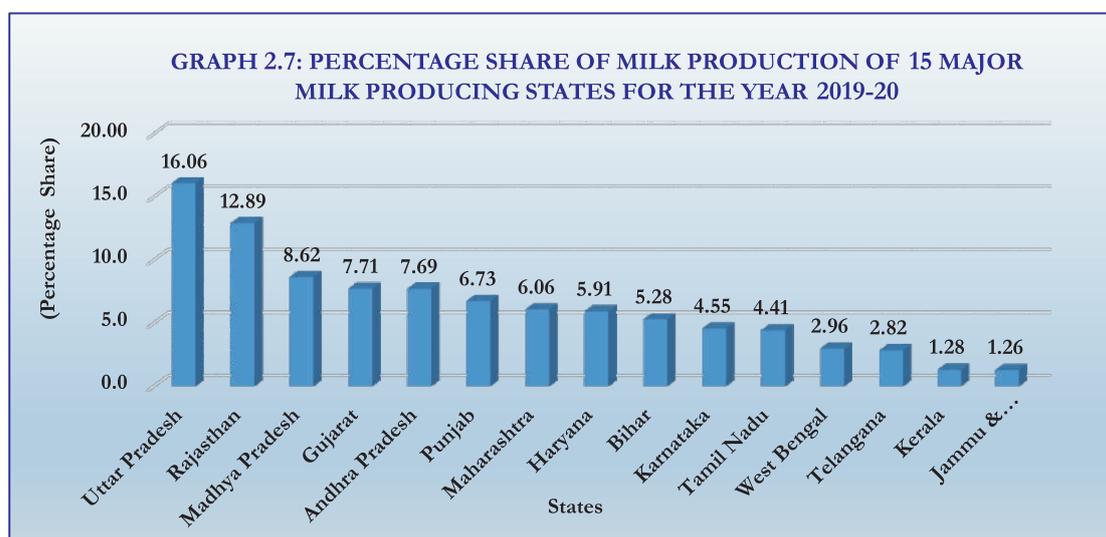

## 2.1.4 STATE-WISE ANNUAL GROWTH OF MILK PRODUCTION DURING 2019-20

State-wise analysis in the growth pattern of milk production during 2019-20 is depicted in **Graph 2.6**. It is observed that 10 States have registered growth of more than 6.00% in the milk production. Amongst them 11 States

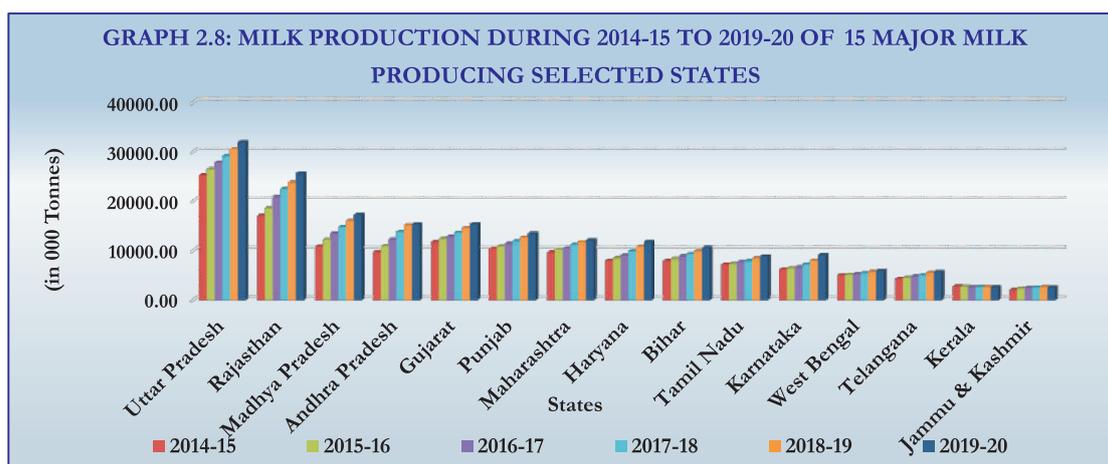

namely Karnataka, Arunachal Pradesh, Haryana, Rajasthan, Madhya Pradesh, Goa, Tripura, Chhattisgarh, Bihar, Jharkhand and Punjab have crossed the national average growth rate of milk production i.e. 5.69%.

## 2.1.5 STATE-WISE SHARE OF MILK PRODUCTION DURING 2019-20

The State-wise share of milk production vis-a-vis total milk production in the country is given in the **Graph 2.7**. The largest producer of milk is Uttar Pradesh with 16.06% of the total milk production in the country followed by Rajasthan that produces 12.89% of the total

milk production. Madhya Pradesh, Gujarat and Andhra Pradesh stand as the third, fourth and fifth largest milk producing states that produce 8.62%, 7.71% and 7.69% of the total milk produced in the country respectively.

The **Graph 2.8** shows State-wise variation in total milk production during 2014-15 to 2019-20. It is observed that states like Uttar Pradesh, Rajasthan, Madhya Pradesh, Andhra Pradesh, Gujarat, Punjab, Maharashtra, Haryana, Bihar,

Tamil Nadu and Karnataka had a progressive trend in the production of milk while Uttar Pradesh remained the largest producer of milk during the entire period.

### 2.1.6 PER CAPITA AVAILABILITY OF MILK DURING 2019-20

The **Graph 2.9** below shows the per-capita availability of milk during 2019-20 in various States/UTs including the All India average.

\* Based on Projected Population of 2019 based on Census-2011

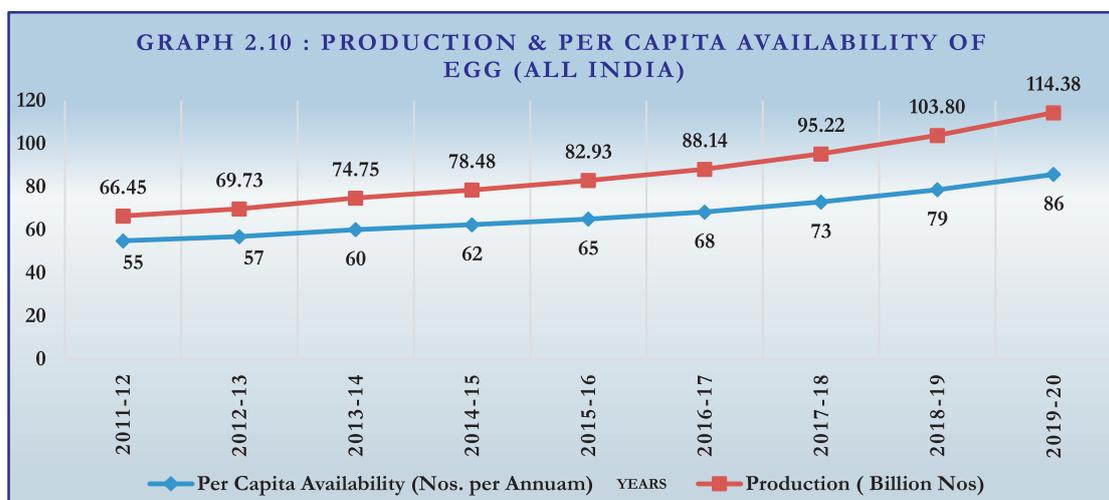

The graph shows that 9 States are having per-capita availability more than the national average with highest per-capita availability in Punjab. It is observed that the success of the initiatives taken to increase the milk

production in view of increasing population is highlighted with the constant increase in the per capita availability of milk across the country.

## 2.2 EGG PRODUCTION

- ❖ The total egg production in the country is 114.38 Billion numbers.
- ❖ India ranks 3rd in the world in terms of total Egg production (Source: FAO).
- ❖ The egg production has increased by 10.19% as compared to previous year.
- ❖ The per-capita availability of egg is 86 eggs per annum.
- ❖ Top 5 egg producing States are Andhra Pradesh (19.17%), Tamil Nadu (17.50%),  
Telangana (12.94%), West Bengal (8.51%).  
Karnataka (5.81%) They together contribute 63.94% of total egg production in the country.
- ❖ The total egg production from commercial poultry is 95.17 Billion numbers and backyard poultry are 19.21 Billion numbers contributing 83.20% and 16.80% of total production of egg respectively.

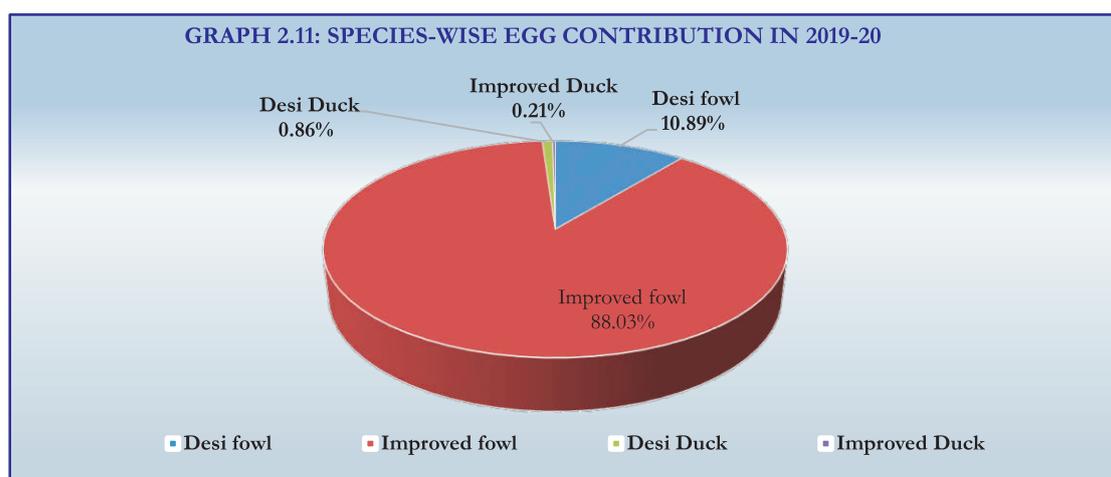

\* Based on Projected Population of 2019 based on Census-2011

The **Graph 2.10** shows that the total egg production in the country was at 66.45 Billion Nos. in the year 2011-12 and since then the production of egg continues to rise over the period. It can be observed in the graph that the Egg production has improved substantially and it reached 114.38 Billion Nos. in the year 2019-20. The per. capita availability was 55

eggs per annum during the period 2011-12. There has been steady.

increase in per capita availability of egg. The per capita availability reached at 86 eggs per annum in the year 2019-20, a seven-point jump from 79 eggs per annum of the previous year 2018-19.

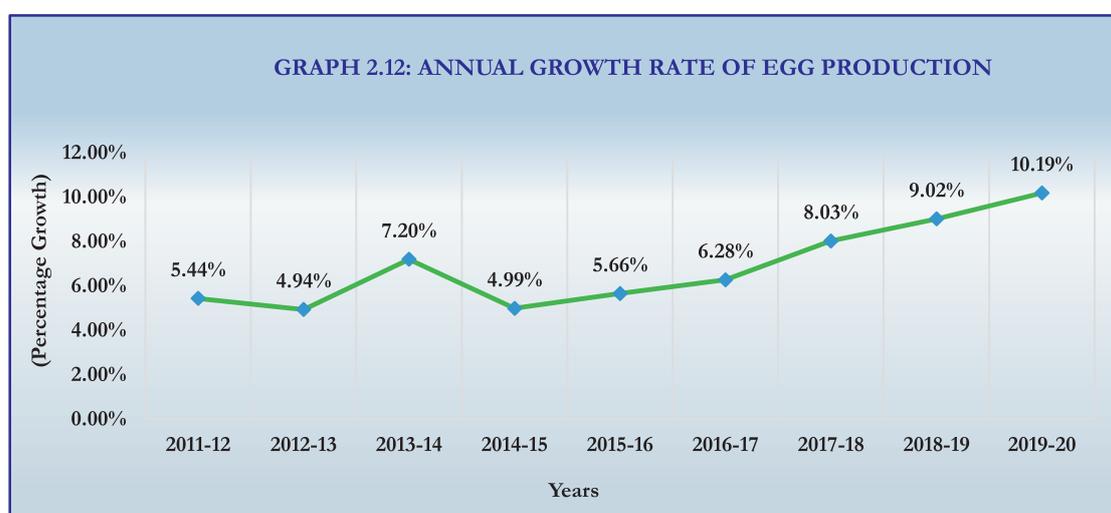

## 2.2.1 SPECIES-WISE EGG CONTRIBUTION

The **Graph 2.11** showing the contribution of egg production by Fowl and Duck. The graph shows Improved Fowl contribute 88.03% of the production of egg and 10.89% is from Desi

Fowls with respect to total production of egg. The Desi Duck and Improved Duck contribute 0.86% and 0.21% respectively with respect to total egg production.

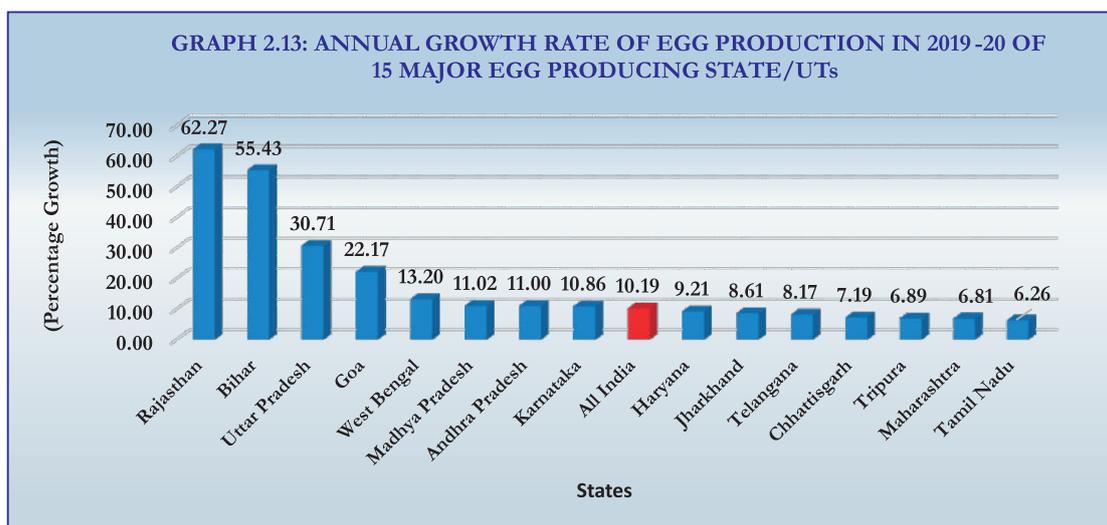

## 2.2.2 ANNUAL GROWTH RATE OF EGG PRODUCTION

The **Graph 2.12** shows the annual growth rate of egg production during the period 2011-12 to 2019-20. As compared to 2018-19, the growth rate of the current year 2019-20 also shows a

significant improvement in the egg production with the growth registered as 10.19%. It is seen that the annual growth rate has crossed over 8% during the last two reference period.

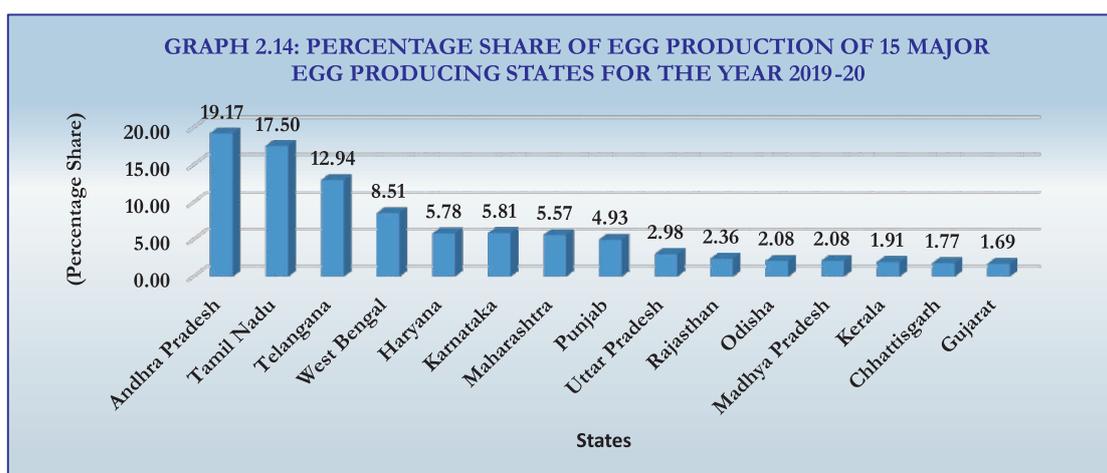

### 2.2.3 STATE-WISE ANNUAL GROWTH OF EGG PRODUCTION DURING 2019-20

State-wise analysis in the growth pattern of egg production during 2019-20 is depicted in **Graph 2.13**. Eight States have crossed the national growth rate, Significant growth in the egg production is seen in the case of Rajasthan,

Bihar, Uttar Pradesh, Goa, West Bengal, Madhya Pradesh, Andhra Pradesh and Karnataka. It is also observed that 8 States have registered growth above 10% during 2019-20 in case of Egg production.

### 2.2.4 STATE-WISE SHARE OF EGG PRODUCTION DURING 2019-20

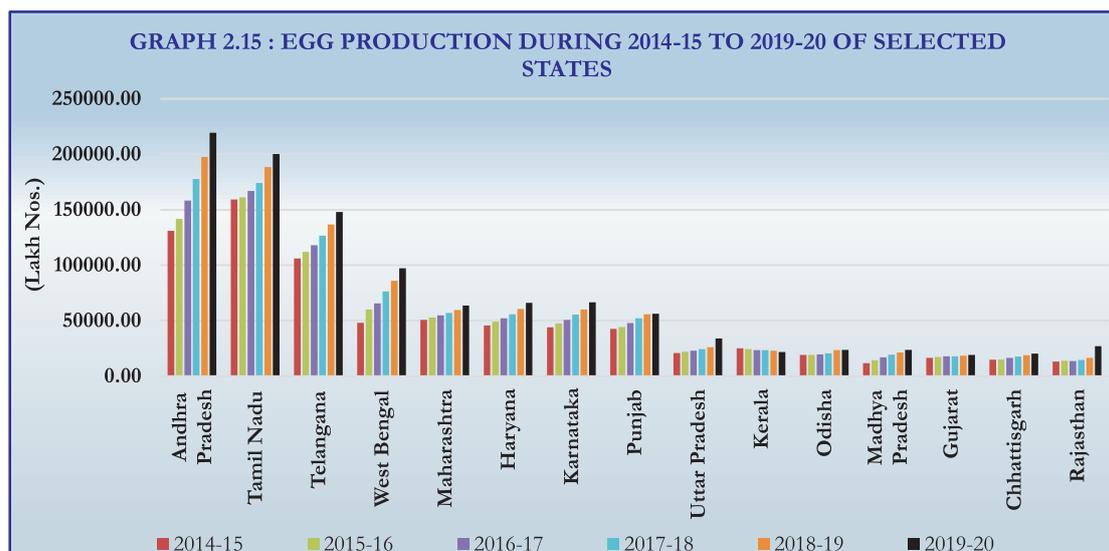

An analysis showing the state-wise share of egg production vis-a-vis total egg production in the country is given in the above **Graph 2.14**.

The largest producer of egg is Andhra Pradesh which produces 19.17% of the total egg production in the country followed by Tamil

Nadu that produces 17.50% of the total egg production. Telangana is the third largest egg producing state in the country with a share of 12.94% of the total egg production in the country. Some other States that contribute more than 5% in the total egg produced across country are West Bengal, Haryana, Karnataka and Maharashtra.

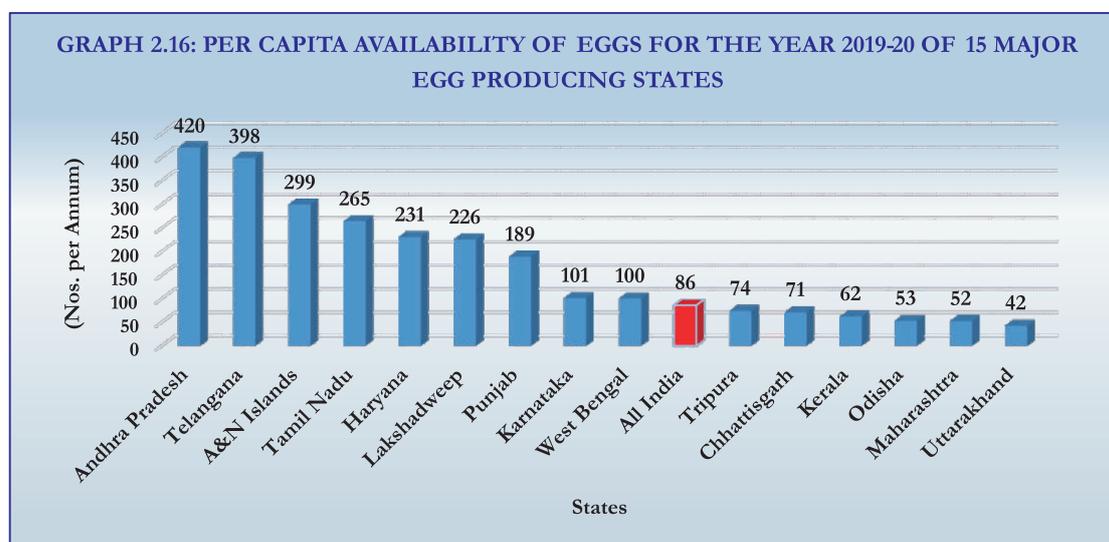

State-wise analysis as depicted in **Graph 2.15** below shows that, during the period 2014-15 to 2019-20, there is a steady increase in the production of egg in all States except for the States like Kerala where the trend in the production estimates marginally fluctuates.

## 2.2.5 STATE-WISE PER CAPITA AVAILABILITY OF EGG

The **Graph 2.16** below shows the per-capita availability of egg during 2019-20 in various States/UTs including the All India average. The

graph shows that 9 States are having per-capita availability more than the national average.

\* Based on Projected Population of 2019 based on Census-2011

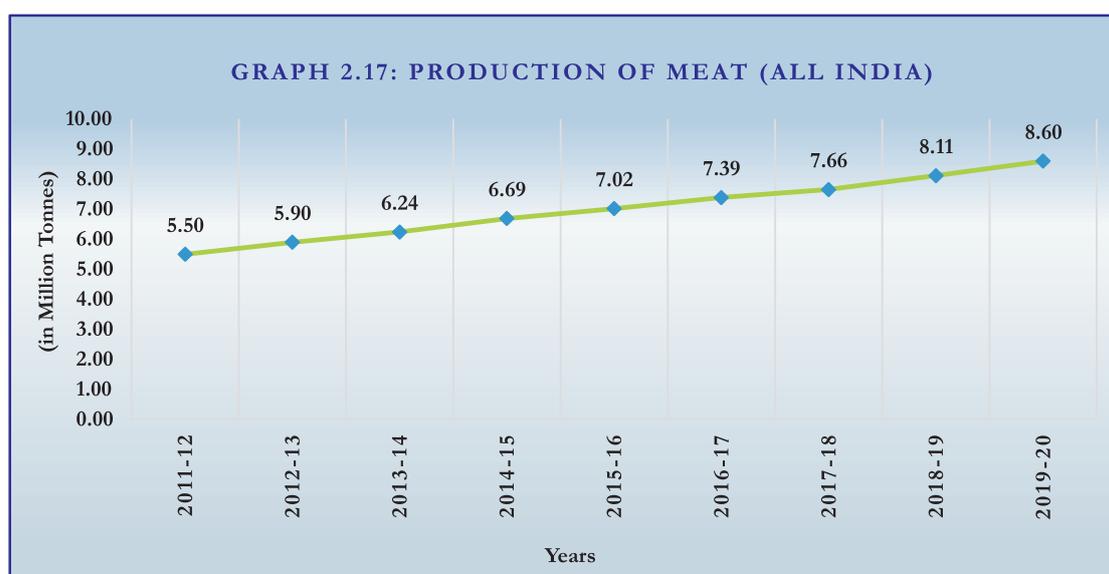

## 2.3 MEAT PRODUCTION

- ❖ The total meat production in the country is 8.60 Million Tonnes.
- ❖ India ranks 5th in the world in terms of total Meat production (Source: FAO).
- ❖ The meat production has increased by 5.98 % as compared to previous year.
- ❖ The meat production from poultry is 4.34 Million tonnes, contributing about

50.50% of total meat production. The growth of poultry meat production has decreased by 6.93% over previous year.

- ❖ The top 5 meat producing States are Uttar Pradesh (13.56%), Maharashtra (13.26%), West Bengal (10.50%), Andhra Pradesh (9.89%) and Telangana (9.86%). They together contribute 57.07% of total meat production in the country.

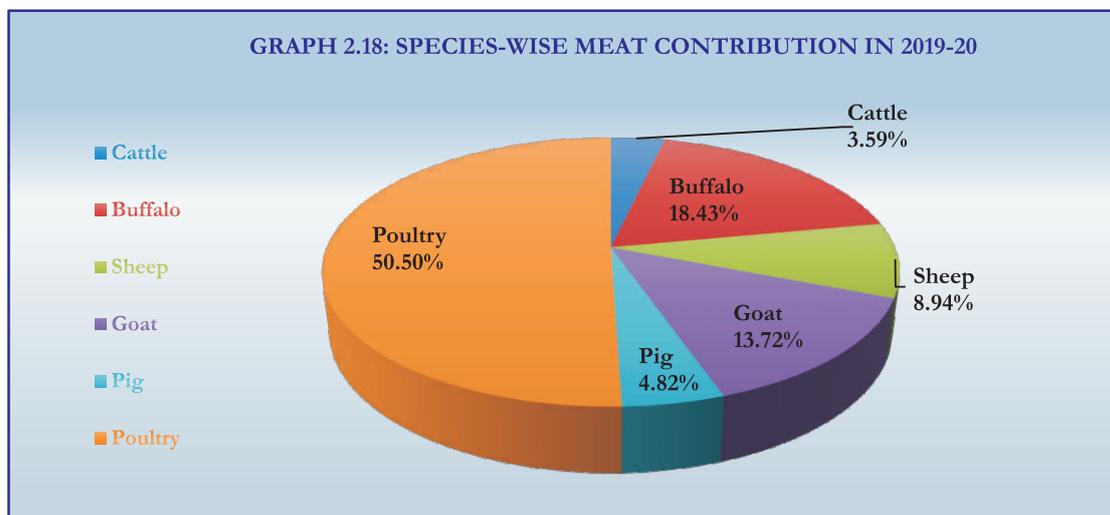

The **Graph 2.17** shows the situation of meat production in the country with a steady increase from 2011-12 onwards and the

production witnessed a leap in the same year due to inclusion of more parameters like Commercial meat production. The total meat

production in the country is 8.6 million tonnes in the year 2019-20 marks a significant progress in the meat production.

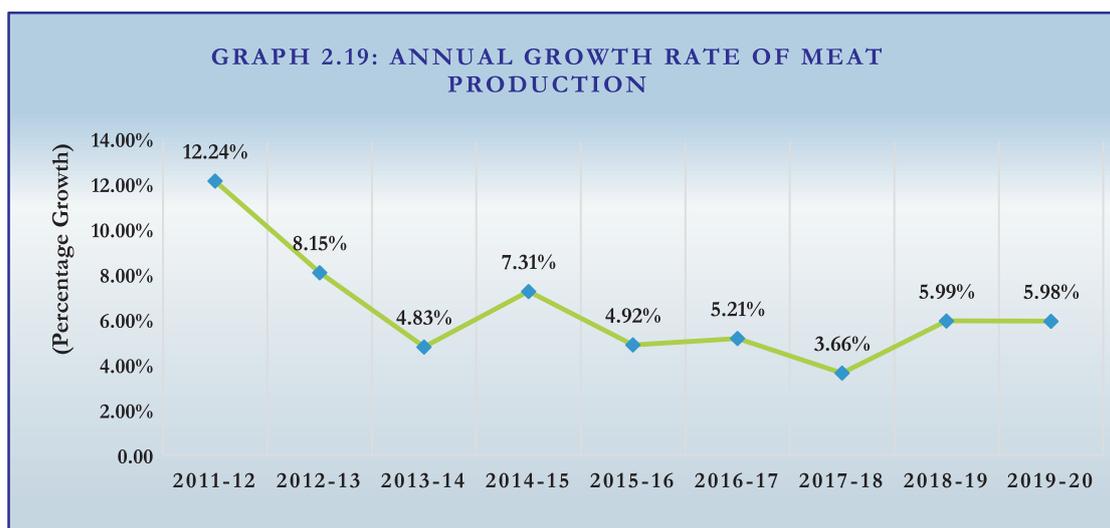

### 2.3.1 SPECIES-WISE MEAT CONTRIBUTION

The **Graph 2.18** shows the contribution of meat production from Cattle, Buffalo, Sheep, Goat, Pig and Poultry in the total meat produced across the country during 2019-20. The diagram shows that nearly 50.50% of meat

production is contributed by Poultry. Buffalo, Goat, Sheep, Pig, and Cattle contributes nearly 18.43%, 13.72%, 8.94%, 4.82% and 3.59% of meat production respectively to the total meat production of the country.

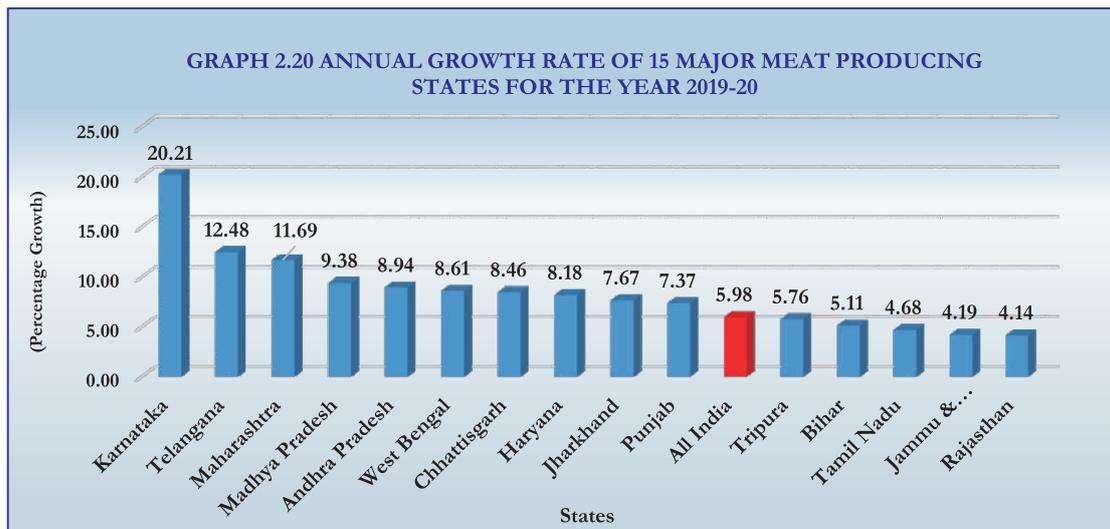

### 2.3.2 ANNUAL GROWTH RATE OF MEAT PRODUCTION

The trend in the annual growth rate of meat production is given in the **Graph 2.19**. The

annual growth rate for the year 2019-20 is 5.98%.

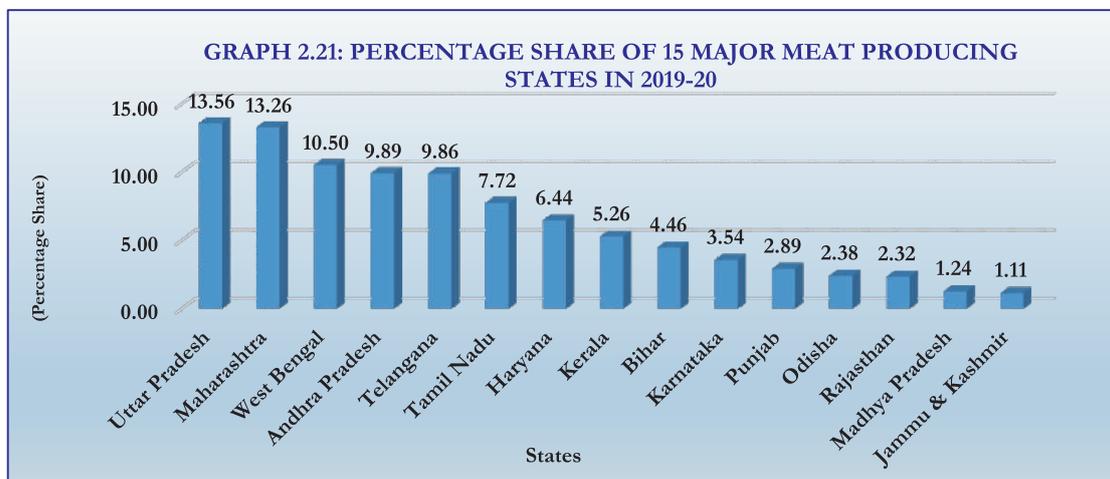

### 2.3.3 STATE-WISE ANNUAL GROWTH OF MEAT PRODUCTION DURING 2019-20

**Graph 2.20** shows that the state-wise variation in the annual growth rate of meat production during 2019-20. This year, the State of Karnataka has registered the highest annual

growth rate i.e. 20.21%. The total 10 States have reported growth over the national average growth rate during 2019-20.

### 2.3.4 STATE-WISE SHARE OF MEAT PRODUCTION DURING 2019-20

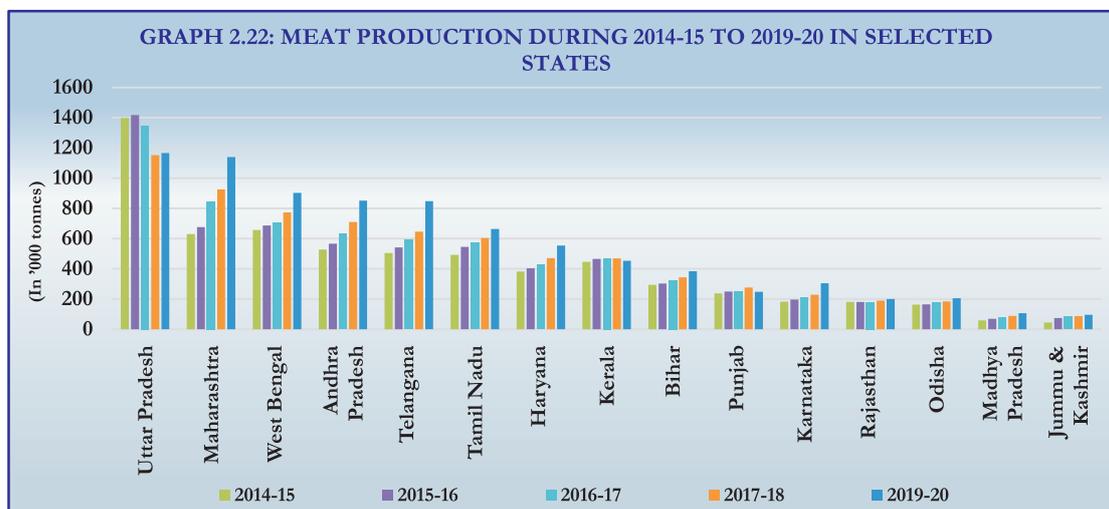

The state-wise share of meat production vis-a-vis total meat production in the country is given in the **Graph 2.21**. The largest meat producing State is Uttar Pradesh that produces 13.56% of the total meat produced in the country followed by Maharashtra that

produces 13.26% of the total meat production. West Bengal is the third largest meat producing state in the country that produces nearly 10.50% of the total meat production in the country.

The State-wise analysis showing the trend in meat production over the period 2014-15 to 2019-20 is depicted in the **Graph 2.22** below.

During these Five years, most of the states have shown increasing trend in the production of meat.

## 2.4. WOOL PRODUCTION

- ❖ The total wool production in the country is 36.76 Million Kgs.
- ❖ The wool production has declined by 9.05% as compared to previous year.
- ❖ The top 5 wool producing States are Rajasthan (34.59%), Jammu & Kashmir (20.34%), Telangana (10.77%), Gujarat (6.07%) and Karnataka (4.74%). They contribute 76.52% of total wool production in the country.

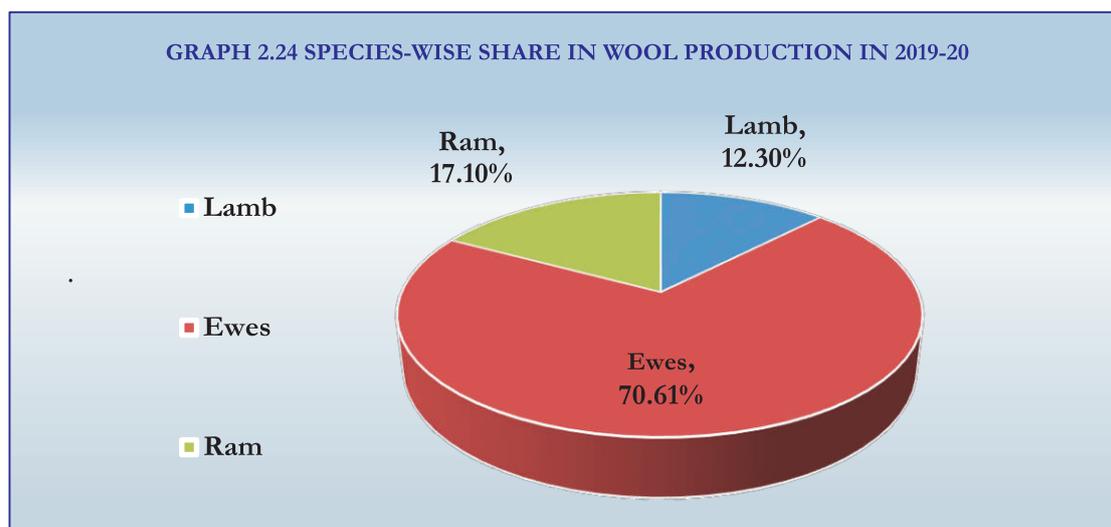

The total wool production in the country was at 44.70 million kg during 2011-12. As per **Graph 2.23**, The Wool Production is fluctuating over the year and slowly declined

to 36.76 million Kg during 2019-20. As compared to 2018-19 the wool production has declined by 9.05% during 2019-20.

## 2.4.1 SPECIES-WISE SHARE OF WOOL PRODUCTION

**Graph 2.24**, shows the contribution of wool production by Ram/Wether, Ewe and Lamb in the total wool production during the year 2019-20. The analysis shows Ewes contribute 70.61% of the total wool production whereas Ram/Wether and Lamb contributes only

17.10% and 12.30% respectively in the total wool produced across the country. Due to lesser population as reported for the lamb shorn and Ram/Wether the production of wool from them is comparatively less to the wool produced from the Ewes.

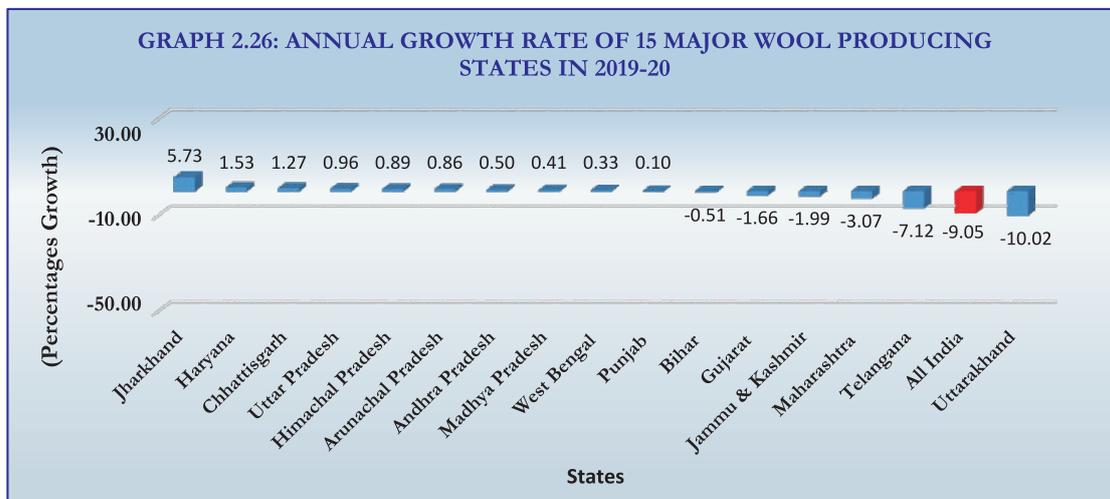

## 2.4.2 ANNUAL GROWTH RATE OF WOOL PRODUCTION

**Graph 2.25** shows the change in production of wool during the year 2011-12 to 2019-20. From the year 2013-14, there is a declining trend in the growth of wool production as has been observed from the graph. The wool production

has witnessed a larger negative growth during 2015-16 and registered as (-) 9.47%. During the year 2019-20 the total wool production in the country has, however again, registered a negative growth of -9.05%.

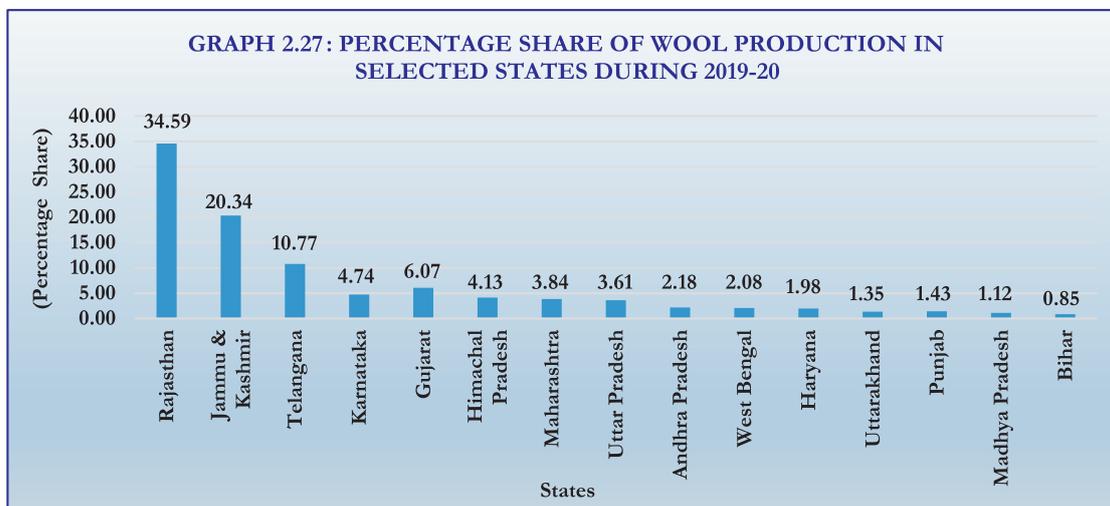

### 2.4.3 STATE-WISE ANNUAL GROWTH OF WOOL PRODUCTION DURING 2019-20

From above **Graph 2.26** it can be seen that Jharkhand has the highest annual growth rate among the states which is 5.73% followed by Haryana registering a growth of 1.53% and

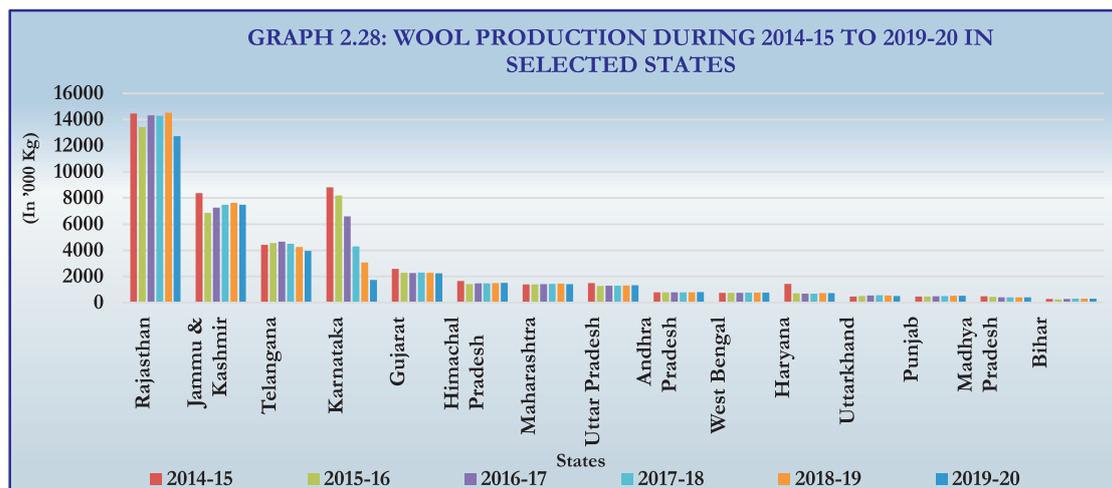

Chhattisgarh with 1.27% in the year 2019-20. However, many leading wools producing States show negative growth in the production as depicted in the graph.

### 2.4.4 STATE-WISE SHARE OF WOOL PRODUCTION DURING 2019-20

The **Graph 2.27** depicts, percentage share of wool production in selected major wool producing States. Rajasthan is the largest producer of wool in the country that contributes 34.59% of the total wool

production followed by Jammu & Kashmir with a share of 20.34%. Telangana is the third largest wool producer state that has share of 10.77% of the total production in the year 2019-20.

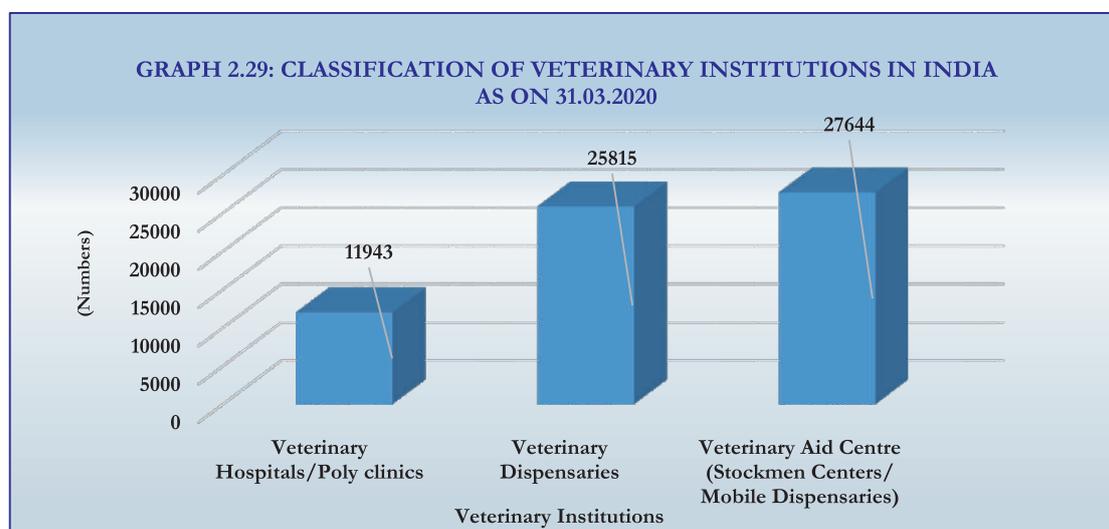

As depicted in above **Graph 2.28** there has been varying trend in the production of wool across various States during the period 2014-15

to 2019-20. Rajasthan is the largest producer of wool throughout the period 2014-15 to 2019-20.

## 2.5. INFRASTRUCTURE

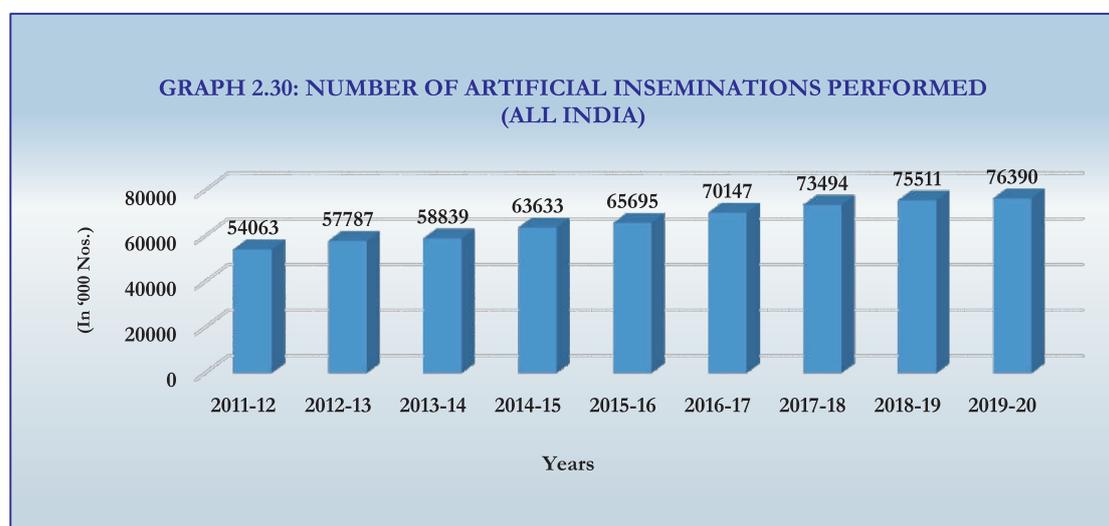

### 2.5.1 INFRASTRUCTURE OF ANIMAL HUSBANDRY SECTOR

The infrastructure of animal husbandry sector is a key area that support for its accelerated growth. **Graph 2.29**, shows there are 25815 Veterinary Dispensaries and 227644 Veterinary Aid Centers, while 11943 Veterinary Hospitals in our country. For an

accelerated growth of Livestock sector strengthening of infrastructure is must.

Artificial insemination is not merely a novel method of bringing about impregnation in females. Instead, it is a powerful tool mostly employed for livestock improvement.

**Graph 2.30** shows the growth in adoption of this methodology over the years in our country. By adoption of artificial insemination, there would be considerable reduction in both genital and non-genital diseases in the farm

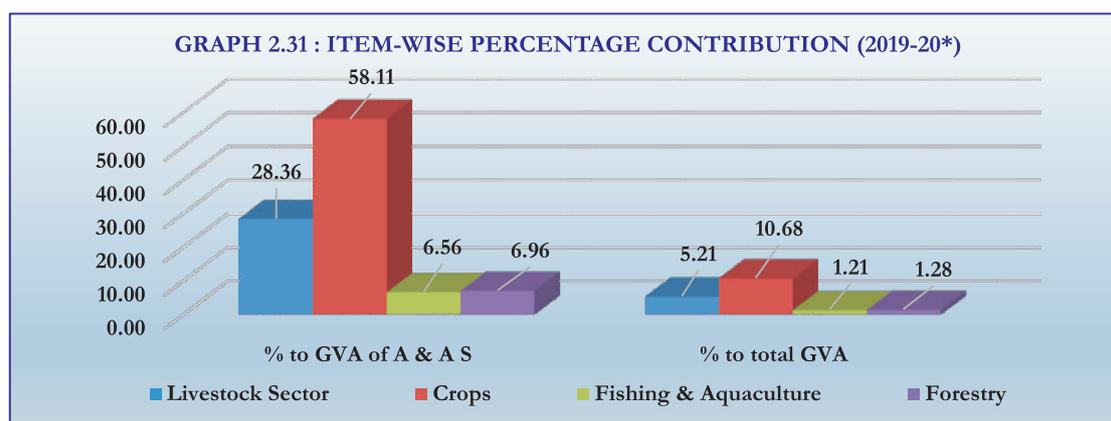

stock. It can be observed that the number of artificial inseminations performed in the country has been increased from 75.51 millions in 2018-19 to 76.39 million in 2019-20.

## 2.6 GROSS VALUE ADDED (GVA)

### 2.6.1 ITEM-WISE PERCENTAGE CONTRIBUTION IN AGRICULTURE & ALLIED SECTOR (A&AS) AND TOTAL GVA

As per first revised estimates of press note on “First Revised Estimates of National Income, Consumption Expenditure and Capital

Formation for 2019-20” released by National Statistical Office (NSO), MoSPI on 29th January, 2021 the Gross Value Added (GVA) of livestock sector is about Rs. 9,62,682 crore Rs. at current prices during FY 2019-20 which is about 28.36% of Agricultural and Allied Sector GVA and 5.21% of Total GVA.

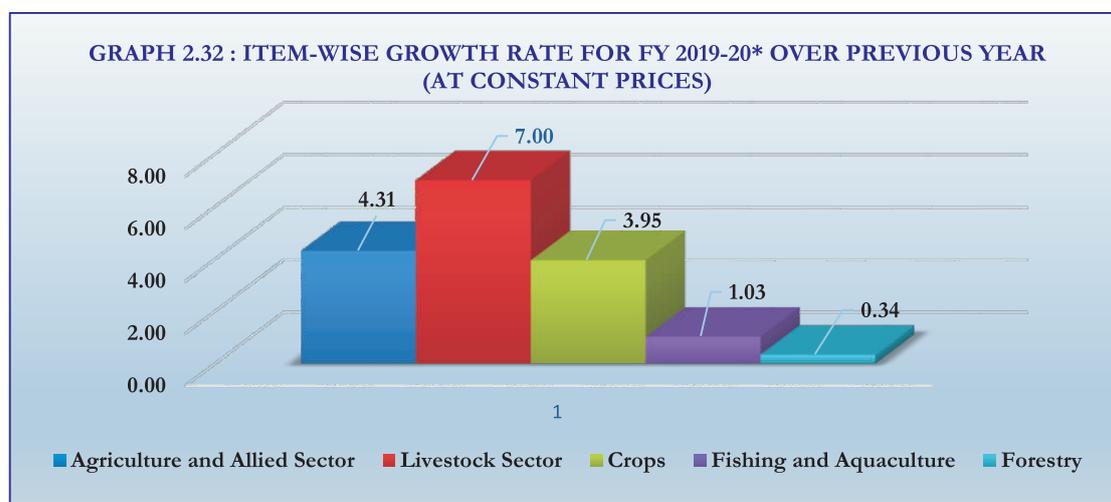

Note: \* First revised estimates  
Source: NAD, NSO, MoSPI.

### 2.6.2 ITEM-WISE ANNUAL GROWTH RATE (AGR)

Livestock, though only half the size of crops, plays a crucial role in driving the agricultural GVA growth. As per the first revised estimates Livestock Sector sees an annual growth rate of

7% at constant prices, more than Crop Sector growth rate which is 3.95%. Even the growth rate for Livestock sector is more than the overall growth rate of Agriculture & Allied Sector which is 4.31% which draws a special attention in better performance of Livestock to drive Indian economy.

Note: \* First revised estimates  
Source: NAD, NSO, MoSPI.

# Milk Production

<b>Year</b> (March to February)	<b>Milk Production</b> (million tonnes)	<b>Human Population</b> (million nos.)	<b>Per Capita Availability</b> (gram /day)
1950-51	17.0	359	130
1955-56	19.0	393	132
1960-61	20.0	434	126
1968-69	21.2	518	112
