CHAPTER ONE

INTRODUCTION

INTRODUCTION

1.1 OVERVIEW

The Animal Husbandry Statistics (AHS) Division of Department of Animal Husbandry & Dairying (DAHD) is entrusted with the generation of Animal Husbandry Statistics through the schemes Livestock Census and Integrated Sample Survey. The Livestock Census (LC) is a quinquennial Census conducted across the country in participation with all the States and Union Territories. This is the basic source of data for the number of livestock and poultry held by the households in the country. The another important aspect is livestock production which is estimated annually based on the outcomes of Integrated Sample Survey (ISS). The survey is conducted in participation with States and Union Territories following a specified time line and methodology. The Survey methodology of Integrated Sample Survey is designed by ICAR-Indian Agricultural Statistics Research Institute (ICAR-IASRI).

Integrated Sample Survey is the only scheme through which considerable data, particularly on the production estimate of Major Livestock Products (MLPs) viz. Milk, Egg, Meat and Wool, is being generated for policy formulation in the livestock sector. Information on number of veterinary hospitals, polyclinic, goshalas, State farms and other infrastructure, number of Artificial Insemination performed and other animal husbandry statistics is also compiled through annual returns.

The present publication of Basic Animal Husbandry Statistics-2021 is framed based mainly on the outcomes of the Integrated Samples Survey for the period 1st March 2020 to 29th February, 2021. It has two Chapters beginning Chapter One: Introduction including brief discussions on objective of survey, survey methodology, reference period, sampling design, analysis of data of milk, egg, meat and wool. Chapter Two contains summary of MLP data on annual production, growth rate, per capita availability, average yield per animal, state-wise & species-wise share etc. The report also contains tables of State-wise data of estimated production of milk, egg, meat and wool. Not only the total production statistics, the book also gives a picture on the estimated number of animals in milk production, estimated poultry egg laying birds, estimated number of animals slaughtered etc. Besides livestock production statistics it is also important to have included related statistics of Livestock population, such as GVA of livestock, export import data etc. so as to facilitate a ready reference of all such vital information. Moreover, the data of infrastructure such as number of veterinary hospitals, polyclinic, goshalas etc. have also been included in this report.

The results of the survey will be of use to the National Accounts Division, Department of Fisheries, Department of Agriculture, Cooperation & Farmers Welfare, Department of Animal Husbandry of States/UT governments, private agencies and research institutions etc. for effective policy, decisions making and researches.

1.2 OBJECTIVE OF THE SURVEY

The primary objective of ISS is to produce animal wise all India as well as state/UT level estimates of 4 major livestock products like milk, egg, meat and wool. It fulfills the need of timely availability of reliable and current data relating to various livestock indicators which will further help in evolving, monitoring and evaluating various developmental schemes in this sector. It also contributes to stock of time series data on production of milk, meat, egg and wool which may be used in research and policy making.

1.3 REFERENCE PERIOD

The Survey is conducted from March to February. The entire period of one year is divided into three Seasons of 4 months. These Seasons are:

Name of the Season	Period of survey
Summer Season	1 st March to 30 th June (122 days)
Rainy Season	1 st July to 31 st October (123 days)
Winter Season	1 st November to 28 th or 29 th February (120 days or 121 days in a leap year)

1.4 COVERAGE OF THE SURVEY

The Survey is conducted in the entire rural/urban areas of States/UTs. As a general principle, the survey is targeted to cover around 5% village in every season taking into account a total 15% villages, nearly 96,000 villages in a year. Since the year 2015-16, the survey covered urban areas too wherein 2 urban wards of each districts are selected at random for estimation of production of major livestock products.

1.5 SAMPLING DESIGN

The sampling design is a stratified three stage design with district as stratum. The first stage units are villages or urban wards, second stage units are households and third and ultimate stage units are animals. The list of villages as per the latest Livestock Census constitutes the sampling frame. As mentioned under 1.2, the survey is conducted across the country in three seasons and based on the seasonal estimates, the annual estimates are derived. The State Department of Animal Husbandry is the nodal agency for implementation of the sample survey. The survey is conducted in two stages, (i) Complete Enumeration and (ii) Detailed Survey. The estimated livestock population is arrived based on complete enumeration and the average yield is calculated based on detailed survey. An outline of the sampling design is described in the following diagram.

Diagram: Selection of sample

For complete enumeration, a general principle of 5% villages/urban wards are selected for each district in a season covering a total of 15% of samples per annum using Simple Random Sampling without Replacement (SRSWOR) in a year. However, this is a general principle and varies according to the size of the district and availability of staff. The 5% villages/urban wards are further grouped into two sub-samples and the production estimates are derived for the two sub-samples separately. This is done for measuring the standard error. For detailed survey, a sample of 4 villages and 1 urban ward are selected from each sub-sample for the estimation of yield rate for rural and urban area separately. The sample villages and wards are selected by the States/UTs at the beginning of every survey period annually.

Since survey is conducted on seasonal basis, each season in a year is divided into 4 rounds (4 months). At the first month of every season the enumerators visit the households in the selected village to list all livestock including poultry available in each household. This is a listing process based on which the total in-milk animals are estimated in case of milk production and total estimated layers in case of egg production, total number of animals/birds slaughtered in case of meat production and number of sheep shorn in case of wool production. For meat production, slaughter houses, poultry farms and butcher shops are also taken into consideration for estimating the number of animals/birds slaughtered. For capturing all these information eight schedules have been designed under the Integrated Sample Survey as mentioned briefly below:

- **SCHEDULE-I - General Information** General information about the villages elected for complete enumeration and particulars of those villages in addition to breed, sex, age wise livestock population as per latest Livestock Census will be collected here.
- **SCHEDULE-II - Complete Enumeration:** Listing of household/household enterprises/non-household enterprises/institution in the village/ward will be done here. The information on Milch

animals and Poultry in the sample and number of Animals Slaughtered during last 4 months will also be recorded in this schedule.

- **SCHEDULE-III - Details of milk yield in selected households:** For detail study, one cluster of two households/enterprises each will be selected from each of six categories of cattle and buffalo for collection of data on milk yield. If none of the households selected for detailed study possess goat in milk, then 2 more households/enterprises having goats in milk should be selected. Beside the milk data, the information on utilization of total milk and dung from cattle, buffalo and goat will also be canvassed in this schedule.
- **SCHEDULE-IV - Details of egg production in selected households:** Selection of two clusters of 5 households/enterprises having layer birds (Fowl & Duck) for collection of yield rate for Desi and Improved Fowl & Duck will be done here along with collection of data on consumption and utilization pattern of Production of eggs etc.
- **SCHEDULE-V - Details of Egg production in the commercial poultry farms:** Collection of data through administrative returns from all layer farms.
- **SCHEDULE-VI - Details of wool production in sample households:** By filing this schedule wool production data will be collected from a sample of 8 households.
- **SCHEDULE-VII - Information on yield of meat from recognized slaughterhouses**
- **SCHEDULE-VIII - Details of Broilers and Layers' Meat production in the commercial poultry farms:** Schedules VII and VIII are related to meat production. So far as meat production is concerned, information number of animals slaughtered will be collected from all recognised slaughter houses in the districts and from all households and butcher shops in all the sample of villages/wards selected for complete enumeration.

TECHNICAL COMMITTEE OF DIRECTION (TCD)- 2020 MEETING

A meeting of Technical Committee of Direction for Improvement of Animal Husbandry Statistics (TCD), for the year 2020-21 was held virtually at Krishi Bhawan, New Delhi under the Chairmanship of Animal Husbandry Commissioner, DAHD and Co-Chairmanship of Director, IASRI, to monitor and give advice on various technical aspects of Integrated Sample Survey.

In similar lines, Technical Monitoring Committees have also been in place at State level to technically advise the State Government on the survey methodology and its implementation.

Summary of Animal Husbandry Statistics-2021

2.1. MILK PRODUCTION

- ❖ Total milk production in the country is 209.96 million tonnes.
- ❖ India ranks 1st in the world in terms of total milk production. (Source: FAO).
- ❖ The milk production has increased by 5.81 % over the previous year.
- ❖ The per-capita availability of milk is 427 grams per day.
- ❖ The average yield per animal per day for exotic/crossbred is 6.62 Kg per day and for indigenous/non-descript is 2.72 Kg per day.
- ❖ The milk production from exotic/crossbred cattle has increased by 16.55 % and indigenous/non-descript cattle has increased by 5.65 % as compared to previous year. The milk production from buffaloes also decreased by -0.57 % as compared to previous year.
- ❖ Top 5 Milk producing States are: Uttar Pradesh (14.94%), Rajasthan (14.63%), Madhya Pradesh (8.57%), Gujarat (7.55%), Andhra Pradesh (7.01%). They together contribute 52.70 % of total Milk production in the country.

**GRAPH 2.1 MILK PRODUCTION & PER CAPITA AVAILABILITY
(ALL INDIA)**

• Based on Projected Population of 2020 based as on Census-2011

A trend showing the increase in milk production over the past few decades is depicted in the **Graph 2.1**. The graph shows there is a consistent increase in the production of milk over the years. The milk production has increased from 198.44 million tonnes in 2019-20 to 209.96 million tonnes in 2020-21 registering a growth of 5.81 %. There has been steady increase in per capita availability of milk since 2014-15. The per capita availability has increased from 319 gm/ day in 2014-15 to 427 gm /day in 2020-21 as illustrated in the **Graph 2.1**.

2.1.1 SPECIES-WISE MILK CONTRIBUTION

The **Graph 2.2** shows the contribution of milk production by Cattle, Buffalo and Goat. The analysis shows nearly 32.13 % of the total milk production is contributed by Indigenous Buffaloes followed by 29.55 % by crossbred cattle. The Indigenous cattle contribute 8.82 % of the total milk production in the country whereas non-descript cattle contribute 11.19 % and non-

descript buffaloes contribute 13.31 % of the total milk production in the country. Goat milk shares a contribution of 2.98 % in the total milk production across the country. Exotic cow has share (2.02%) to the total milk production.

2.1.2 ANNUAL GROWTH RATE OF MILK PRODUCTION

Graph 2.3 indicates the annual growth rate of milk production during 2014-15 to 2020-21. In the current year 2020-21, the milk production registered an annual growth of 5.81%. The consistent growth in the total milk production of the country accounts is on account of the various initiatives taken by the Government to increase the milk production to support the increasing Human population.

2.1.3 AVERAGE YIELD OF MILK PER COW PER DAY

Graph 2.4 shows that the milk yield of Exotic/Crossbred cows reported 6.62 Kgs per cow per day during 2020-21 and Indigenous/Non-descript cows reported yield of 2.72 Kgs per cow per day during the year 2020-21.

Graph 2.5 : State-wise Yield Rate of Milk during 2020-21 in 15 Major Milk Producing States

The yield rate was showing a progressive trend during the year 2020-21. The State-wise variation in the yield rate of milk in leading milk producing States is depicted in **Graph 2.5**.

2.1.4 STATE-WISE ANNUAL GROWTH OF MILK PRODUCTION DURING 2020-21

GRAPH 2.6 GROWTH RATE OF MILK PRODUCTION OF 15 MAJOR MILK PRODUCING STATES FOR THE YEAR 2020-21

State-wise analysis in the growth pattern of milk production during 2020-21 is depicted in **Graph 2.6**. It is observed that 6 States have registered growth of more than 6.00% in the milk production. Amongst them 6 States namely Karnataka, Rajasthan, Maharashtra, Tamil Nadu, Bihar and Mizoram have crossed the national average growth rate of milk production i.e. 5.81 %.

2.1.5 STATE-WISE SHARE OF MILK PRODUCTION DURING 2020-21

The State-wise share of milk production vis-a-vis total milk production in the country is given in the **Graph 2.7**. The largest producer of milk is Uttar Pradesh with 14.94% of the total milk production in the country followed by Rajasthan that produces 14.63% of the total milk production. Madhya Pradesh, Gujarat and Andhra Pradesh stand as the third, fourth and fifth largest milk producing states that produce 8.57%, 7.55% and 7.01% of the total milk produced in the country respectively.

The **Graph 2.8** shows State-wise variation in total milk production during 2014-15 to 2020-21. It is observed that states like Uttar Pradesh, Rajasthan, Madhya Pradesh, Andhra Pradesh, Gujarat, Punjab, Maharashtra, Haryana, Bihar, Tamil Nadu and Karnataka had a progressive trend in the production of milk while Uttar Pradesh remained the largest producer of milk during the entire period.

2.1.6 PER CAPITA AVAILABILITY OF MILK DURING 2020-21

The **Graph 2.9** below shows the per-capita availability of milk during 2020-21 in various States/UTs including the All-India average.

* Based on Projected Population of 2020 based on Census-2011

The graph shows that 10 States are having per-capita availability more than the national average with highest per-capita availability in Punjab. It is observed that the success of the initiatives taken to increase the milk production in view of increasing population is highlighted with the constant increase in the per capita availability of milk across the country.

2.2 EGG PRODUCTION

- ❖ The total egg production in the country is 122.05 billion numbers.
- ❖ India ranks 3rd in the world in terms of total Egg production (Source: FAO).
- ❖ The egg production has increased by 6.70 % as compared to previous year.
- ❖ The per-capita availability of egg is 90 eggs per annum.
- ❖ Top 5 egg producing States are Andhra Pradesh (20.45%), Tamil Nadu (16.49%), Telangana (12.98%), West Bengal (8.60%). Karnataka (6.24%) They together contribute 64.77% of total egg production in the country.
- ❖ The total egg production from commercial poultry is 103.25 billion numbers and backyard poultry are 18.80 billion numbers contributing 84.60% and 15.40% of total production of egg respectively.

Graph 2.10: Production & Per Capita Availability of Egg (All India)

* Based on Projected Population of 2020 based on Census-2011

The **Graph 2.10** shows that the total egg production in the country was at 78.48 Billion Nos. in the year 2014-15 and since then the production of egg continues to rise over the period. It can be observed in the graph that the Egg production has improved substantially and it reached 122.05 Billion Nos. in the year 2020-21. The per capita availability was 62 eggs per annum during the period 2014-15. There has been steady

increase in per capita availability of egg. The per capita availability reached at 90 eggs per annum in the year 2020-21, a Four-point jump from 86 eggs per annum of the previous year 2019-20.

2.2.1 SPECIES-WISE EGG CONTRIBUTION

The **Graph 2.11** showing the contribution of egg production by Fowl and Duck. The graph shows Improved Fowl contribute 88.73% of the production of egg and 10.25% is from Desi Fowls with respect to total production of egg. The Desi Duck and Improved Duck contribute 0.86% and 0.17% respectively with respect to total egg production.

2.2.2 ANNUAL GROWTH RATE OF EGG PRODUCTION

The **Graph 2.12** shows the annual growth rate of egg production during the period 2014-15 to 2020-21. The Annual Growth Rate for the year 2020-21 is registered as 6.70%.

2.2.3 STATE-WISE ANNUAL GROWTH OF EGG PRODUCTION DURING 2020-21

GRAPH 2.13: ANNUAL GROWTH RATE OF EGG PRODUCTION IN 2020-21 OF 15 MAJOR EGG PRODUCING STATE/UTS

State-wise analysis in the growth pattern of egg production during 2020-21 is depicted in **Graph 2.13**. Nine States have crossed the national growth rate, Significant growth in the egg production is seen in the case of Sikkim, Karnataka, Andhra Pradesh, Jharkhand, Madhya Pradesh, Haryana, Bihar, West Bengal and Telangana. It is also observed that 9 States have registered growth above 7% during 2020-21 in case of Egg production.

2.2.4 STATE-WISE SHARE OF EGG PRODUCTION DURING 2020-21

GRAPH 2.14: PERCENTAGE SHARE OF EGG PRODUCTION OF 15 MAJOR EGG PRODUCING STATES FOR THE YEAR 2020-21

The above **Graph 2.14** showing the state-wise share of egg production during 2020-21. The largest producer of egg is Andhra Pradesh which produces 20.45% of the total egg production in the country followed by Tamil Nadu that produces 16.49% of the total egg production. Telangana is the third largest egg producing state in the country with a share of 12.98% of the total egg production in the country. Some other States that contribute more than 5% in the total egg produced across country are West Bengal, Karnataka, Haryana and Maharashtra.

State-wise analysis as depicted in **Graph 2.15** below shows that, during the period 2014-15 to 2020-21, there is a steady increase in the production of egg in all States except for the States like Kerala where the trend in the production estimates marginally fluctuates.

2.2.5 STATE-WISE PER CAPITA AVAILABILITY OF EGG

The **Graph 2.16** below shows the per-capita availability of egg during 2020-21 in various States/UTs including the All-India average. The graph shows that 9 States are having per-capita availability more than the national average.

2.3. MEAT PRODUCTION

- ❖ The total meat production in the country is 8.80 million tonnes.
- ❖ India ranks 8th in the world in terms of total Meat production (Source: FAO).
- ❖ The meat production has increased by 2.30 % as compared to previous year.
- ❖ The meat production from poultry is 4.47 million tonnes, contributing about 50.84% of total meat production. The growth of poultry meat production has decreased by 2.97% over previous year.
- ❖ The top 5 meat producing States are Maharashtra (12.60%), Uttar Pradesh (11.79%) West Bengal (11.30%), Andhra Pradesh (10.84%) and Telangana (10.46%). They together contribute 57.00% of total meat production in the country.

GRAPH 2.17 : PRODUCTION & PER CAPITA AVAILABILITY OF MEAT (ALL INDIA)

The **Graph 2.17** shows that the total Meat production in the country was at 6.69 Million Tonnes in the year 2014-15 and since then the production of Meat continues to rise over the period. It can be observed in the graph that the Meat production has improved substantially and it reached 8.80 Million Tonnes in the year 2020-21. The per capita availability was 5.32 kg per annum during the period 2014-15. There has been steady

increase in per capita availability of Meat. The per capita availability reached at 6.52 Kg/Annum the year 2020-21, a 0.07-point jump from 6.45 Kg/Annum of the previous year 2019-20.

2.3.1 SPECIES-WISE MEAT CONTRIBUTION

GRAPH 2.18: SPECIES-WISE MEAT CONTRIBUTION IN 2020-21

The **Graph 2.18** shows the contribution of meat production from Cattle, Buffalo, Sheep, Goat, Pig and Poultry in the total meat produced across the country during 2020-21. The diagram shows that nearly 50.84% of meat production is contributed by Poultry. Buffalo, Goat, Sheep, Pig, and Cattle contributes nearly 17.97%, 13.78%, 10.04%, 4.06% and 3.31% of meat production respectively to the total meat production of the country.

2.3.2 ANNUAL GROWTH RATE OF MEAT PRODUCTION

GRAPH 2.19: ANNUAL GROWTH RATE OF MEAT PRODUCTION

The trend in the annual growth rate of meat production is given in the **Graph 2.19**. The annual growth rate for the year 2020-21 is 2.30%.

2.3.3 STATE-WISE ANNUAL GROWTH OF MEAT PRODUCTION DURING 2020-21

Graph 2.20 shows that the state-wise variation in the annual growth rate of meat production during 2020-21. This year, the State of Karnataka has registered the highest annual growth rate i.e. 19.50%. The total 12 States have reported growth over the national average growth rate during 2020-21.

2.3.4 STATE-WISE SHARE OF MEAT PRODUCTION DURING 2020-21

The state-wise share of meat production vis-a-vis total meat production in the country is given in the **Graph 2.21**. The largest meat producing State is Maharashtra that produces 12.60% of the total meat produced in the country followed by Uttar Pradesh that produces 11.79% of the total meat production. West Bengal is the third largest meat producing state in the country that produces nearly 11.30% of the total meat production in the country.

The State-wise analysis showing the trend in meat production over the period 2014-15 to 2020-21 is depicted in the **Graph 2.22** below. During these Seven years, most of the states have shown increasing trend in the production of meat.

2.4. WOOL PRODUCTION

- ❖ The total wool production in the country is 36.93 Million Kgs.
- ❖ The Wool production has increased by 0.46 % as compared to previous year.
- ❖ The top 5 wool producing States are Rajasthan (42.45%), Jammu & Kashmir (20.71%), Telangana (9.11%), Gujarat (5.43%) and Maharashtra (4.20%). They contribute 81.90% of total wool production in the country.

GRAPH: 2.23 PRODUCTION OF WOOL (ALL INDIA)

The total wool production in the country was at 48.10 million kg during 2014-15. As per **Graph 2.23**, The Wool Production has increased 36.93 Million Kg during 2020-21. As compared to 2019-20 the wool production has increased by 0.46 % during 2020-21.

2.4.1 SPECIES-WISE SHARE OF WOOL PRODUCTION

Graph 2.24, shows the contribution of wool production by Ram/Wether, Ewe and Lamb in the total wool production during the year 2020-21. The analysis shows Ewes contribute 66.17% of the total wool production whereas Ram/Wether and Lamb contributes only 18.51% and 15.32% respectively in the total wool produced across the country. Due to lesser population as reported for the lamb shorn and Ram/Wether the production of wool from them is comparatively less to the wool produced from the Ewes.

2.4.2 ANNUAL GROWTH RATE OF WOOL PRODUCTION

Graph 2.25 shows the change in production of wool during the year 2014-15 to 2020-21. The wool production has witnessed a larger negative growth during 2015-16 and registered as (-) 9.47%. The total wool production in the country has positive growth rate 0.46% During the year 2020-21.

2.4.3 STATE-WISE ANNUAL GROWTH OF WOOL PRODUCTION DURING 2020-21

From above **Graph 2.26** it can be seen that Rajasthan has the highest annual growth rate among the states which is 23.27% followed by Maharashtra registering a growth of 9.77% and Madhya Pradesh with 4.67% in the year 2020-21.

2.4.4 STATE-WISE SHARE OF WOOL PRODUCTION DURING 2020-21

The **Graph 2.27** depicts, percentage share of wool production in selected major wool producing States. Rajasthan is the largest producer of wool in the country that contributes 42.45% of the total wool production followed by Jammu & Kashmir with a share of 20.71%. Telangana is the third largest wool producer state that has share of 9.11% of the total production in the year 2020-21.

GRAPH 2.28: WOOL PRODUCTION DURING 2014-15 TO 2020-21 IN SELECTED STATES

As depicted in above **Graph 2.28** there has been varying trend in the production of wool across various States during the period 2014-15 to 2020-21. Rajasthan is the largest producer of wool throughout the period 2014-15 to 2020-21.

2.5. INFRASTRUCTURE

2.5.1 INFRASTRUCTURE OF ANIMAL HUSBANDRY SECTOR

GRAPH 2.29: CLASSIFICATION OF VETERINARY INSTITUTIONS IN INDIA AS ON 31.03.2021

The infrastructure of animal husbandry sector is a key area that support for its accelerated growth. **Graph 2.29**, shows there are 25834 Veterinary Dispensaries and 27994 Veterinary Aid Centers, while 11974 Veterinary Hospitals in our country. For an accelerated growth of Livestock sector strengthening of infrastructure is must.

Artificial insemination is not merely a novel method of bringing about impregnation in females. Instead, it is a powerful tool mostly employed for livestock improvement.

GRAPH 2.30: NUMBER OF ARTIFICIAL INSEMINATIONS PERFORMED (ALL INDIA)

Graph 2.30 shows the growth in adoption of this methodology over the years in our country. By adoption of artificial insemination, there would be considerable reduction in both genital and non-genital diseases in the farm stock. It can be observed that the number of artificial inseminations performed in the country has been increased from 97.31 millions in 2019-20 to 98.92 million in 2020-21.

2.6 GROSS VALUE ADDED (GVA)

2.6.1 ITEM-WISE PERCENTAGE CONTRIBUTION IN AGRICULTURE & ALLIED SECTOR (A&AS) AND TOTAL GVA

As per first revised estimates of press note on “First Revised Estimates of National Income, Consumption Expenditure and Capital Formation for 2020-21” released by National Statistical Office (NSO), MoSPI on 31st January, 2022 the Gross Value Added (GVA) of livestock sector is about Rs. 11,14,249 crore Rs. at current prices during FY 2020-21 which is about 30.87% of Agricultural and Allied Sector GVA and 6.17% of Total GVA.

2.6.2 ITEM -WISE ANNUAL GROWTH RATE (AGR)

Livestock, though only half the size of crops, plays a crucial role in driving the agricultural GVA growth. As per the first revised estimates Livestock Sector sees an annual growth rate of 6.13% at constant prices, more than Crop Sector growth rate which is 1.90%. Even the growth rate for Livestock sector is more than the overall growth rate of Agriculture & Allied Sector which is 3.32% which draws a special attention in better performance of Livestock to drive Indian economy.
